UNIVERSITY SEAL AND MOTTO

Soon after Northwestern University was founded, its Board of Trustees adopted an official corporate seal. This seal, approved on June 26, 1856, consisted of an open book surrounded by rays of light and circled by the words *Northwestern University, Evanston, Illinois.*

Thirty years later Daniel Bonbright, professor of Latin and a member of Northwestern's original faculty, redesigned the seal, retaining the book and light rays and adding two quotations. On the pages of the open book he placed a Greek quotation from the Gospel of John, chapter 1, verse 14, translating to *The Word . . . full of grace and truth.* Circling the book are the first three words, in Latin, of the University motto: *Quaecumque sunt vera* (Whatsoever things are true). The outer border of the seal carries the name of the University and the date of its founding. This seal, which remains Northwestern's official signature, was approved by the Board of Trustees on December 5, 1890.

The full text of the University motto, adopted on June 17, 1890, is from the Epistle of Paul the Apostle to the Philippians, chapter 4, verse 8 (King James Version).

Northwestern
University

Whatsoever things are true,
whatsoever things are honest,
whatsoever things are just,
whatsoever things are pure,
whatsoever things are lovely,
whatsoever things are of good report;
if there be any virtue,
and if there be any praise,
think on these things.

DISMISSAL

HENRY S. BIENEN

President Emeritus

President emeritus Henry S. Bienen served as Northwestern's 15th president (1995–2009) and returned on September 16, 2025, to serve as interim president.

A nationally recognized leader in higher education, Bienen led Northwestern to increased academic prominence, research prowess, financial strength, and athletic success. During his tenure, Northwestern faculty and students received numerous academic awards, the endowment quintupled, applications for admission skyrocketed, and the University's reputation grew both nationally and internationally.

Prior to becoming Northwestern's president, Bienen was the James S. McDonnell Distinguished University Professor and dean of the Woodrow Wilson School of Public and International Affairs (now called the School of Public and International Affairs) at Princeton University.

Among other posts, Bienen has been a consultant to the US Department of State, the National Security Council, and the Agency for International Development. He is also a member of the American Academy of Arts and Sciences.

He received an honorary doctor of humane letters degree from Northwestern University in 2009. In 2008 Northwestern's Board of Trustees honored Henry Bienen and his wife, Leigh, a senior lecturer emerita at Northwestern Pritzker School of Law, by naming the University's music school the Henry and Leigh Bienen School of Music.

PETER J. BARRIS

Chair, Board of Trustees

Peter J. Barris joined the Northwestern University Board of Trustees in 2021 and was elected chair in 2023. He previously served in board vice chair and committee chair roles.

Barris joined New Enterprise Associates (NEA) in 1992 and was the firm's managing general partner from 1999 to 2017. Having retired in 2019, Barris now serves as chairman emeritus. During his 18 years at the helm, NEA's assets under management grew from $1 billion to more than $20 billion and the organization scaled its operations to become one of the world's largest venture capital firms. Under Barris's leadership, NEA invested in such industry-transforming technology companies as CareerBuilder, Tableau, Groupon, Jet.com, Juniper Networks, Salesforce.com, TiVo, WebMD, and Workday. He has been named to the Washington Tech Council's Hall of Fame, to the Washington Business Hall of Fame, and several times to the Forbes Midas List of top technology investors. Barris has personally led investments in over three dozen technology companies that have successfully completed public offerings or mergers. He currently serves on the board of directors for the public companies Sprout Social (SPT) and Tempus AI (TEM). Barris also serves on the boards of the Brookings Institution, P33, In-Q-Tel, and the private company Tamr.

Prior to joining NEA, Barris was president of Legent Corporation (LGNT) and senior vice president of the Systems Software Division of UCCEL Corporation (UCE). Both companies were ultimately acquired at valuations that were record-breaking for their time. Earlier, he spent almost a decade at General Electric Company in a variety of management positions, including vice president and general manager at GE Information Services. In addition to chairing Northwestern's Board of Trustees, Barris has served on the executive committee of the National Venture Capital Association board and the Tuck School of Business at Dartmouth board of overseers and was a founding member of Venture Philanthropy Partners, a philanthropic organization in the Washington, DC, area.

Barris received his BSEE from Northwestern University and his MBA from the Tuck School.

LAND ACKNOWLEDGMENT

To recognize the land is an expression of gratitude and appreciation to those whose territory we reside on—and a way of honoring the Indigenous people who have been living and working on the land from time immemorial. It is important to understand the long-standing history that has brought us to reside on the land and to seek to understand our place within that history.*

Northwestern is a community of learners situated within a network of historical and contemporary relationships with Native American tribes, communities, parents, students, and alumni. It is also in close proximity to an urban Native American community in Chicago and near several tribes in the Midwest. The Northwestern campus sits on the traditional homelands of the people of the Council of Three Fires, the Ojibwe, Potawatomi, and Odawa, as well as the Menominee, Miami, and Ho-Chunk nations. It was also a site of trade, travel, gathering, and healing for more than a dozen other Native tribes; the state of Illinois is still home to over 100,000 tribal members.

It is within Northwestern's responsibility as an academic institution to disseminate knowledge about Native peoples and the institution's history with them. Consistent with the University's commitments, Northwestern works toward building relationships with Native American communities through academic pursuits, partnerships, historical recognitions, community service, and enrollment efforts.

HISTORY OF NORTHWESTERN

The founding of Northwestern University by nine Methodists embodied a mixture of religious conviction and secular optimism that is uniquely American. Meeting above a hardware store in the burgeoning frontier town of Chicago, these nine resolved on May 31, 1850, to establish an institution of "the highest order of excellence." The 1851 Act of Incorporation creating Northwestern University contained a provision reflecting the strong religious beliefs of its founders but requiring no particular religious faith of students or members of the faculty.

In 1853 the University bought and began to develop 379 acres of lakeshore farmland. The town that grew up around Northwestern was named for John Evans, one of the University's founders. By 1855 Northwestern had completed its first building and opened a College of Liberal Arts. By 1900 the University encompassed six additional schools, including the medical and law schools in Chicago. Since the establishment of the Graduate School in 1910, Northwestern has provided graduate as well as undergraduate instruction, emphasizing research along with teaching.

The University's development since then has paralleled the growth of metropolitan Chicago. Today Northwestern is a private research university of distinction, with 11 academic divisions located on two lakefront campuses in Evanston and Chicago as well as Northwestern University in Qatar, which opened in Doha in 2008. Northwestern's vision of excellence—although faithful to its founding—invigorates a territory far beyond the old Northwest Territory through the accomplishments of its alumni and by virtue of a distinguished faculty and high-achieving student body drawn from across the nation and around the world.

The **Judd A. and Marjorie Weinberg College of Arts and Sciences**, established in 1851 as the College of Liberal Arts, offers the degree of bachelor of arts. Through the School of Professional Studies, Weinberg College also offers the degrees of bachelor of philosophy and bachelor of science in general studies.

The **School of Communication**, established in 1878 as the School of Oratory and later renamed the School of Speech, offers the degrees of bachelor of arts, bachelor of science, master of arts, master of science, doctor of audiology, and doctor of speech-language pathology. Through the School of Professional Studies, the School of Communication also offers the degree of bachelor of philosophy in communication.

The **School of Education and Social Policy**, established in 1926 as the School of Education, offers the degrees of bachelor of science and master of science.

The **Robert R. McCormick School of Engineering and Applied Science**, established in 1909 as the College of Engineering, offers the degrees of bachelor of science, master of engineering management, master of product design and development management, and master of science. McCormick offers the master of business administration/artificial intelligence in conjunction with the J. L. Kellogg School of Management.

The **Graduate School**, established in 1910, administers programs leading to the degrees of master of arts, master of fine arts, master of public health, master of science, and doctor of philosophy.

The **Medill School of Journalism, Media, Integrated Marketing Communications**, established in 1921 as the Medill School of Journalism, offers the degrees of bachelor of science and master of science.

The **Pritzker School of Law**, established in 1859 as the School of Law, offers the degrees of juris doctor, master of laws, master of science in law, master of studies in law, and doctor of juridical science. The school also offers the Master of Laws International Executive Master's Program in Israel, South Korea, and Spain.

The **J. L. Kellogg School of Management**, established in 1908 as the School of Commerce, offers the degrees of master of business administration and master in management. Kellogg offers the master of business administration/artificial intelligence in conjunction with the Robert R. McCormick School of Engineering and Applied Science. In addition to the Full-Time MBA program, Kellogg offers the Evening and Weekend MBA program on the Chicago campus, the Executive MBA program in Evanston and Miami, and joint Executive MBA programs with partners in Canada, China (Beijing and Hong Kong), and Germany.

The **Feinberg School of Medicine**, established in 1859 as the Medical School, offers the degrees of master of medical science, master of prosthetics and orthotics, doctor of medicine, and doctor of physical therapy.

The **Henry and Leigh Bienen School of Music**, established in 1895 as the School of Music, offers the degrees of bachelor of music, bachelor of arts, and bachelor of science. In its graduate division, the school offers the degrees of master of music and doctor of musical arts.

The **School of Professional Studies'** primary mission is to provide qualified adult learners with access to a Northwestern education. Serving approximately 13,000 adult degree and nondegree students each year, SPS offers 14 graduate degrees, undergraduate degrees with 12 majors, 25 graduate certificates, 16 certificates of advanced graduate study, 14 graduate microcertificates, 23 postbaccalaureate certificates, and 21 noncredit professional development certificates. Twelve SPS master's degrees and five bachelor's degrees are available entirely online.

Northwestern University in Qatar, established in 2008 as part of Education City in the Qatari capital of Doha, offers the degree of bachelor of science in journalism through the Medill School of Journalism, Media, Integrated Marketing Communications and the degree of bachelor of science in media industries and technologies through the School of Communication.

Modern academic attire originated in the medieval universities of Europe, where gowns were worn daily to provide warmth in poorly heated buildings and to differentiate scholars from fellow citizens. Two English universities, Oxford and Cambridge, are particularly noted for developing the authentic academic costume, which has changed only slightly through the centuries.

In the United States most academic dress follows the general provisions of the Intercollegiate Code of 1895, which was revised in 1932 and again in 1959. Under this code a gown's trim and sleeve design indicates the level of the degree. The bachelor's gown has pointed sleeves and is worn closed; the master's gown has oblong sleeves with an arc at the bottom and may be worn open or closed; and the doctor's gown, which may also be worn open or closed, has velvet facings down the front and three velvet bars on the bell-shaped sleeves. This velvet trim may be black or the prescribed color of the academic area. Though the recommended color for gowns is black, Northwestern (like many institutions) has adopted a colored gown to reflect the University's color. All participating candidates wear a custom purple gown featuring the University crest.

The style of hood identifies the level of the degree, the institution that granted it, and the academic area. Hood length and border width show the level of the degree. The master's hood is three and one-half feet; the doctor's is four feet. The velvet border of the hood is three and five inches wide for the master's and doctor's degrees, respectively. The hood is lined with silk in the institution's official color. At Northwestern the hood is lined in purple (the school's color) and gold. The color of the hood's border—and at Northwestern the color of the cap's tassel as well—indicates the academic area. Tassels feature the Northwestern seal signet. At Northwestern the colors for the Graduate School constitute an exception; tassels are black, but the border color of the hood indicates the specific degree awarded. Bachelor's degree regalia include a souvenir stole.

The square black mortarboard is the recommended cap, although some schools have adopted other styles. Caps are worn throughout the Commencement ceremony, except that men remove them for the national anthem.

At Northwestern University members of honor societies may be recognized by the honor cords, medallions, and stoles worn.

The tassels and borders of the hoods are the following colors:

Judd A. and Marjorie Weinberg College of Arts and Sciences . . . . . White

School of Communication . . . . . Silver gray

School of Education and Social Policy . . . . . Light blue

Robert R. McCormick School of Engineering and Applied Science . . . . . Orange

MICHAEL GRAETZEL

Doctor of Science

Michael Graetzel studies colloidal semiconductor nanocrystals and their application to solar energy conversion and storage. His research has led to groundbreaking discoveries in photovoltaics, electrochemistry, and photoelectrochemistry, addressing the urgent need to develop low-cost and efficient systems for converting sunlight to electricity and chemical fuels. Graetzel is particularly well known for his discovery of mesoscopic dye-sensitized solar cells—named "Graetzel cells" in his honor—which in turn engendered the advent of perovskite photovoltaics. He has applied this concept to carbon dioxide reduction, solar generation of hydrogen, and high-power lithium-ion battery development. Recipient of 16 previous honorary degrees, Graetzel is an elected fellow or member of the United Kingdom's Royal Society, the Chinese Academy of Science, the Swiss Academy of Technical Sciences, and Germany's National Academy of Sciences Leopoldina and Order Pour le Mérite in Art and Sciences. His numerous awards include the Millennium Technology Grand Prize, the Balzan Prize, and the Global Energy Prize. A professor at Switzerland's École Polytechnique Fédérale de Lausanne, Graetzel graduated from the Free University of Berlin and earned his doctorate at Technical University Berlin.

Presented by Mercouri Kanatzidis, Charles E. and Emma H. Morrison Professor, Department of Chemistry, Weinberg College of Arts and Sciences

Your pioneering research in physical chemistry, materials science, and nanoscience has led to seminal breakthroughs in the fields of renewable energy and photovoltaics. Among your many accolades, you have been hailed as the father of artificial photosynthesis. Your numerous prestigious awards and extensive list of publications bear witness to your international prominence. We thank you for all you have done to enhance our understanding of the world, and we are gratified to add to your many honors.

HEATHER HEADLEY

Doctor of Arts

Tony and Grammy Award–winning singer Heather Headley was born and spent most of her childhood on the Caribbean island of Trinidad before her family moved to the US in the 1990s. On Broadway she originated the role of Nala in the Tony-winning musical *The Lion King* and the title role in *Aida*, for which she won the Tony Award for best actress in a musical. Headley earned two Grammy nominations for her debut album, *This Is Who I Am*, and her *Audience of One* won a Grammy for best contemporary R&B gospel album. After originating the leading role of Rachel Marron in London's West End premiere of *The Bodyguard,* for which she received an Olivier nomination, Headley returned to Broadway as Shug Avery in the Tony-winning revival of *The Color Purple* and later portrayed the Witch in New York City Center's Encores! production of *Into the Woods*. Among other performances, she played a recurring role on NBC's *Chicago Med*, appeared as Clara Ward in the Aretha Franklin biopic *Respect*, and currently stars as Helen Decatur on the hit Netflix series *Sweet Magnolias*. Headley is a graduate of Northwestern's School of Communication.

Presented by Masi Asare, Associate Professor, Department of Theatre, School of Communication

Your electrifying solo number in Northwestern's 1995 Waa-Mu Show gave notice that a new star was on the rise, and your illustrious career has more than fulfilled that promise. Your Tony and Grammy Awards testify to your extraordinary artistry. You have generously shared your unique talents in support of many worthy causes, including the March of Dimes, Equity Fights AIDS, the Actors Fund, the Elton John Foundation, Chicago's own By The Hand Club, Points of Light, and the Chicago Symphony Orchestra and Lyric Opera of Chicago. We are proud to call you one of our own.

SARAH JESSICA PARKER

Doctor of Arts

Award-winning actor, producer, and businesswoman Sarah Jessica Parker has garnered four Golden Globe Awards, three Screen Actors Guild Awards, and two Emmy Awards. In a career spanning five decades, Parker is best known for her starring role as Carrie Bradshaw in the six-season HBO series *Sex and the City*, for which she also served as an executive producer. Parker went on to coproduce and star in the series' two big-screen continuations, *Sex and the City* and *Sex and the City 2*. More recently she returned as Carrie and executive producer for the three seasons of HBO Max's spin-off series *And Just Like That. . . .* Her many other film credits include *The Family Stone*, *Hocus Pocus*, and *Hocus Pocus 2*. In 2022 she appeared opposite her husband, Matthew Broderick, in a revival of *Plaza Suite*, which became the third-highest-grossing play revival in Broadway history. Parker served as an executive producer for *The Librarians*, which made the 2026 BAFTA longlist in the documentary category. In 2026 the Golden Globe Foundation honored her with its prestigious Carol Burnett Award, recognizing outstanding contributions to television.

Presented by Alana Arenas, Assistant Professor of Instruction, Department of Theatre, School of Communication

On film, television, and the Broadway stage, you have won audiences' hearts with your enviable style and seemingly effortless art. Through two series totaling nine seasons as well as two hit movies, you have made *Sex and the City* one of the most successful entertainment sagas of our time. A forceful advocate for libraries, education, and the arts, you have demonstrated your passion for literature by launching your own publishing venture. We are delighted to honor your multifaceted achievements.

DAVID J. SKORTON

Doctor of Science

David J. Skorton has enjoyed a distinguished career in government, higher education, and medicine. He served for 26 years on the faculty of the University of Iowa, where he cofounded and codirected the Adolescent and Adult Congenital Heart Disease Clinic. After leading that university as its president from 2003 to 2006, he held the same position from 2006 to 2015 at Cornell University. Skorton then led the Smithsonian Institution for four years as its 13th secretary. Since 2019 he has been the president and CEO of the not-for-profit Association of American Medical Colleges, which represents medical schools, academic health systems, teaching hospitals, and academic societies. A pioneer of cardiac imaging and computer processing techniques, Skorton is an elected member of the National Academy of Medicine, the American Academy of Arts and Sciences, the Council on Foreign Relations, and the American Philosophical Society as well as a fellow of the American Association for the Advancement of Science. An alumnus of Northwestern, where he earned his BS and MD, Skorton received a 2006 Northwestern Alumni Merit Award and the Feinberg School of Medicine's 2009 Distinguished Alumnus Award.

Presented by Clyde Yancy, Vice Dean for Health Equity and Magerstadt Professor, Department of Medicine, Feinberg School of Medicine

As an alumnus of both the Weinberg College of Arts and Sciences and the Feinberg School of Medicine, you have brought nationwide honor to Northwestern through a distinguished career spanning academics, medicine, and administration. Your election to elite learned societies testifies to your eminence in multiple fields. As a jazz musician and composer, you epitomize the vital importance of connecting science, the arts, and the humanities. We are thrilled to welcome you back to your alma mater.

James Kennedy has taught adapted physical education since 2017 at Neuqua Valley High School in Naperville, Illinois, where he is also the Best Buddies sponsor and Special Olympics coach. Previously he was a special education paraprofessional and a physical education teacher at John F. Kennedy Elementary School in Schiller Park, Illinois. Recipient of a Neuqua Valley High School PTSA grant, he has also won a District 204 Indian Prairie School District A+ Educator Award. Student nominators Bhavi Barnwall of the McCormick School of Engineering and Applied Science and Preena Shroff of the Weinberg College of Arts and Sciences both participated in Kennedy's Peer Partners class as mentors for student athletes with physical or cognitive disabilities. "Mr. Kennedy shaped my understanding of leadership, mindfulness, and respect," says Shroff. "I am certain that the skills I gained in his Peer Partners class will guide me for the rest of my life." Barnwall says, "Through his consistency and warmth, he cultivated an atmosphere where joy, patience, and respect thrived." Kennedy earned a BS with K–12 physical education certification at Northern Illinois University and an MS in special education with endorsements as learning behavior specialist 1 and 2 at Northeastern Illinois University.

Alessandra King has taught mathematics since 2010 at Holton-Arms School in Bethesda, Maryland, where she cocreated the Integrated Math sequence, launched the Directed Reading Program and STEM Alumnae Speaker Program, was awarded five summer faculty grants, served as middle school math coordinator, and is currently the upper school STEM enrichment coordinator and sponsor of the Math Club and other groups. Since 2016 she has also been a mathematics instructor for the Art of Problem Solving Academy, an after-school and summer enrichment program. Previously she taught mathematics and physics at Italy's Liceo Scientifico Omnicomprensivo, the Brent International School in Manila, and Green Hedges School in Vienna, Virginia, where she headed the math department and later served as math department coordinator. Author of more than 50 articles and posts for professional journals and websites, King coedits the "Quick Reads" department in the National Council of Teachers of Mathematics' *Mathematics Teaching in the Middle School* and is a reviewer for the new NCTM journal *Mathematics Teacher: Learning and Teaching PK–12.* Student nominator Maya Solomon of the McCormick School of Engineering and Applied Science calls her "an academic treasure" who "has all of the best traits required of a teacher: fun, humility, brilliance, and passion." King graduated summa cum laude from Public Classical High School "G. Berchet" in Milan, Italy, and earned a doctorate in physics from the Italian University system.

Brian Sweeney has taught English and journalism since 2012 at Townsend Harris High School at Queens College in Flushing, New York, where he directs the school's Writers Academy, heads the professional learning committee, and advises the award-winning school newspaper. Previously he was an English teacher and literacy coach at Louis Pasteur Middle School 67 in Little Neck, New York. Sweeney is a Journalism for All and Press Pass NYC mentor and New York City Department of Education peer collaborative educator and has served as president of the New York City Scholastic Press Association. His honors include the Queens Flag Award for Teaching Excellence, the Class Size Matters Advocacy Group's Skinny Award, the Student Press Law Center's National High School Courage in Student Journalism Award, Ithaca College's S'Park Media Mentor Award, and Youth Journalism International's Journalism Educator of the Year Finalist Award. Student nominator Micah Sandy of the Medill School of Journalism, Media, Integrated Marketing Communications says that "as teacher, editor, and mentor, he has helped connect me with numerous opportunities that have helped me grow in ways I otherwise wouldn't have." Sweeney received a BA summa cum laude from Hamilton College, an MA from the University of Chicago, and an MS in education from St. John's University.

Jim Walker has taught science since 2007 at Carroll High School in Fort Wayne, Indiana, where he chairs the science department and K–12 district science curriculum alignment team and sponsors the Gamers and Student Mental Health Clubs. As an advocate for equity and inclusion, Walker works closely with the school's administration and special education department. In addition to offering an annual Indiana Dunes class trip and annual campus tree planting, he has led 11 summer ecotours to Costa Rica. Beyond the classroom he is a strong and articulate champion of public education. He supports his colleagues and students by representing the local association in discussions with administration and the school board. Walker is a National Board-Certified Teacher, was selected as the secondary teacher of the year in his district for the 2024–25 school year, and was featured in Fort Wayne's *Journal Gazette* as a 2022 Teacher Honor Roll nominee. Student nominator Alexander Barb of the McCormick School of Engineering and Applied Science says that "every course I have taken at Northwestern has benefited from the instruction he gave me" in what Barb calls "my most memorable, fulfilling, and engaging high school class." Walker earned a BS in secondary biology education at Manchester University and an MS in secondary science education at Indiana University.

Hello, Class of 2026.

Congratulations. Sincere congratulations.

Four years ago, I was on Deering Meadow as your class gathered for March Through the Arch. Your families lingered nearby, taking one more photograph, straightening a collar, holding on a few seconds longer than planned before finally letting go. I was honored to observe their pride and welcome you to the University while serving as president of the Northwestern Alumni Association Board of Directors.

Now here we are, joined again by tradition. This time, I am writing on behalf of the 50th Reunion class as we welcome you, the newest graduates of Northwestern University, with the enthusiasm of people who know what you did to get here.

The Class of ’76 and the Class of ’26 are linked in ways that go beyond the satisfying symmetry of our graduation years. We are bookending the nation’s birthday: My class graduated as America threw itself a bicentennial celebration; yours heads into the world as the country approaches 250 years. There’s a deeper connection, though, that is less festive and more meaningful. Both of our classes emerged at unsettling times.

My classmates and I arrived at Northwestern in the long shadow of Watergate, and we graduated as the Vietnam War finally, painfully ended. The country felt unmoored in ways that were hard to articulate and impossible to ignore.

You enrolled when COVID-19 still loomed large. You inherited a country in sustained argument with itself over foundational matters. You were asked, repeatedly, to adapt to shifting conditions before you had finished adjusting to the previous ones.

That kind of prolonged uncertainty does something to a person that more settled times simply don’t. It builds a specific kind of judgment, the ability to sit with ambiguity and still make decisions, the capacity to keep moving when the clearer path hasn’t revealed itself yet. I am not romanticizing what your four years required of you. I am noting what those years built in you.

There are also real differences between the world you are entering and the one my class joined.

When I left Northwestern in 1976, staying in touch was genuinely difficult. Letters took time. Long-distance phone calls cost money that many of us didn’t have in great supply. The slow erosion of distance and years was accepted as an ordinary feature of adult life; there was no real alternative. Friendships that deserved to survive sometimes didn’t, not out of indifference but because the effort required to maintain them eventually exceeded what daily life left room for.

But for you, the ability to stay connected—to your classmates, to Northwestern, to the larger world you are stepping into—has never been more accessible or more powerful. I know something about this from personal experience. A substantial part of my career in public service was spent working to build and expand the infrastructure that makes that connectivity possible and to ensure it reaches communities that need it most.

The people sitting near you right now are worth the effort to keep close. The friends who knew you during these four years—not a carefully composed version of you but the real one, working through difficulty in real time—can provide support that friends made under easier circumstances rarely do.

Northwestern, too, will keep giving if you remain in relationship with it. My story certainly reflects that truth. During my senior year, I met a woman named Leslie A. Wiley ’79. We got married and have built a life together that has been the finest thing I have done.

Northwestern, after graduation, also connected me with mentors, among them former Federal Communications Commission chairs Newton Minow ’49, ’50 JD, ’65 H (’12 P) and Richard Wiley ’55, ’58 JD (’28 GP), who showed me concretely what it looks like to treat public service as a vocation rather than a line on a résumé.

What I gained at Northwestern did not end when I received my diploma. It kept developing, opening doors, shaping the choices I made for decades afterward. Your relationship with Northwestern will do the same.

You are leaving with something real: the ability to think carefully, engage honestly with hard problems, and do serious work without waiting for conditions to become more convenient. The world has no shortage of challenges that will require precisely those talents and skills.

Be thoughtful and courageous. Take the leap when it deserves to be taken. Tend the relationships that matter. Hold on to what you actually believe. Stay curious longer than seems strictly necessary. Stay connected to the people, organizations, and institutions that are important to you.

From all of us in the Class of 1976: We are proud of you—specifically, genuinely, and with a full understanding of what these four years asked of you. We can’t wait to witness what you will do next.

Go ’Cats!

Kelly E. Mayo, PhD, Dean

Doctor of Philosophy

Degree awarded September 5, 2025

Carlton Odell Adams, Driskill Graduate Program in Life Sciences; Feinberg. Legionella pneumophila *Type II Secretome Reveals a Polysaccharide Deacetylase That Impacts Intracellular Infection, Biofilm Formation, and Resistance to Polymyxin- and Serum-Mediated Killing*; Nicholas Cianciotto, adviser.

Adetoye Henry Adekoya, Materials Science and Engineering; McCormick. *CALPHAD-Assisted Optimization of Thermoelectric Materials: The Defect Energy Formalism*; G. Jeffrey Snyder, adviser.

Nicolette Danielle Alayon, Political Science; Weinberg. *Parasocial Influence and Political Attitudes: The Power of Celebrity in American Politics*; Alvin Tillery, adviser.

Zachary Marcus Anderson, Psychology; Weinberg. *Relationship Between Inflammatory Signaling, Reward Processing, and the Development of Trilevel Symptoms*; Robin Nusslock, adviser.

Naz Deniz Atik, Psychology; Weinberg. *Children's Use of Sentential Context in Word Recognition and Word Learning in Unfamiliar-Accented Speech*; Sandra Waxman, adviser.

Michelle Avataneo, Managerial Economics and Strategy; Kellogg. *Essays on the Evolution of Morality*; Nicola Persico, adviser.

Bakare Awakoaiye, Driskill Graduate Program in Life Sciences; Feinberg. *Utilizing Viral Vectors Against Infectious Diseases and Tumors*; Pablo Penaloza-MacMaster, adviser.

Manuel Ballester Matito, Computer Science; McCormick. *Physics-Informed and Data-Driven Methods for Computational Imaging and Sensing*; Aggelos Katsaggelos, adviser.

Elizabeth Barahona, History; Weinberg. *Black and Latino Coalition Building in Durham, North Carolina, 1980–2010*; Geraldo Cadava, adviser.

Beth Barker, Philosophy; Weinberg. *A Practical Guide to Know-How*; Sanford Goldberg, adviser.

Rosemary Bauer, Driskill Graduate Program in Life Sciences; Feinberg. *Pathogenic Variation in Insulin Resistance Genes Is Common in Polycystic Ovary Syndrome (PCOS)*; Margrit Urbanek, adviser.

Hannah Jane Bausch, Earth and Planetary Sciences; Weinberg. *Shock-Ramp Compression of (Mg,Fe) O at Earth's Core-Mantle Boundary Conditions and Beyond Using Experiment and Theory*; Steven Jacobsen, adviser.

Rio Mckade Bergh, English; Weinberg. *"Convulsively Written Reminiscences": The Language of Environmental Catastrophe in 19th-Century American Literature*; Kelly Wisecup, adviser.

Raina Vaishnavi Bhagat, Comparative Literary Studies; Weinberg. *Nucleopoesis: Racializing Atomic Energy in Global Science Fictions*; Evan Mwangi, adviser.

Marisa Ravena Bisram, Mechanical Engineering; McCormick. *Numerical Simulation Development and Characterization Enabling Manufacturing Design of Hybrid Multiarchitecture Composites*; Jian Cao, adviser.

Herminio Bodon, Technology and Social Behavior; Communication and McCormick. *Modeling Computing Engagement Across Domains: Design Factors That Shape Learner Experiences*; Marcelo Worsley, adviser.

Taylor Kristine Brown, Biomedical Engineering; McCormick. *Sympathetic Regulation of Vascular Smooth Muscle Cell Phenotype for Translational Vascular Graft Design*; Bin Jiang, adviser.

Carley L. P. Butler, Biomedical Engineering; McCormick. *Neural Control of Elbow Flexor and Extensor Muscles in Humans with Spinal Cord Injury*; Monica Perez and Eric Perreault, advisers.

Matthew Capek, Interdisciplinary Biological Sciences; McCormick and Weinberg. *Evolutionary Adaptations of Insects to Extreme Thermal Environments*; Marco Gallio, adviser.

Ann Louise Carroll, Psychology; Weinberg. *Are the Brakes Working? The Relationship Between Emotion Regulation, Positive Urgency, and Prefrontal Regulatory Networks*; Robin Nusslock, adviser.

Mary Frances Cassidy, Biomedical Engineering; McCormick. *Enzyme-Directed Targeting of Biopolymers for Myocardial Regenerative Engineering*; Nathan Gianneschi, adviser.

John Peter Cavaliere, Chemistry; Weinberg. *Harnessing Multivalency in Nanostructures and Molecular Therapeutics*; Chad Mirkin, adviser.

Mian Chen, History; Weinberg. *China's Propaganda Complex: Communist Propagandists and the Making of Modern China (1921–1965)*; Peter Carroll, adviser.

Ran Chen, Physics; Weinberg. *Design, Fabrication, and Optimization of a Novel TES-Based Detector for CEvNS Process*; Enectali Figueroa-Feliciano, adviser.

Kathleen Cheng, Driskill Graduate Program in Life Sciences; Feinberg. *Lymphoma Mutations to Enhance Potency of Adoptive Cellular Therapies*; Benjamin Singer, adviser.

Larry Yuen Cheng, Psychology; Weinberg. *Practice in Your Sleep: The Effects of Sleep-Dependent Replay on Selection and Execution of Motor Skills*; Ken Paller, adviser.

Zelei Cheng, Computer Science; McCormick. *Towards Trustworthy Deep Reinforcement Learning*; Xinyu Xing, adviser.

Soujin Jinnie Choi, Communication Sciences and Disorders; Communication. *Early Pathways to Phonological Awareness: The Role of Caregiver and Child Factors in Infancy and Toddlerhood*; Elizabeth Norton, adviser.

Ann Catherine Corbitt, Philosophy; Weinberg. *Uncovering the Relationship Between Poetry and Philosophy: An Analysis of Plato's* Ion, Symposium, Phaedrus, *and* Republic; Richard H. Kraut, adviser.

Christopher Paul Cyr, Interdepartmental Neuroscience; Communication, Feinberg, McCormick, and Weinberg. *The Effects of Intracranial Electrical Stimulation on Large-Scale Networks Mapped Within Extensively Sampled Individuals*; Rodrigo Braga, adviser.

Anushka Dasgupta, Materials Science and Engineering; McCormick. *Chemical Functionalization of Low-Dimensional Semiconductors for Next-Generation Photonic Applications*; Mark Hersam, adviser.

Alexandra Lauren Day, Computer Engineering; McCormick. *Development of Artificial Intelligence Techniques for Automated Nanoparticle Characterization*; Alok Choudhary, adviser.

Adrien Edmond Deberghes, Chemical and Biological Engineering; McCormick. *Designing Oxidative Electrocatalytic Systems for the Sustainable Production of Critical Chemicals*; Linsey Seitz, adviser.

Chantal Marie Loresco De Leon, Linguistics; Weinberg. *Integrating Multiple Sources of Social Information in Sociolinguistic Perception*; Annette D'Onofrio, adviser.

Tuba Dolar, Mechanical Engineering; McCormick. *Leveraging Uncertainty Quantification in Machine Learning for Data-Driven Engineering Design*; Wei Chen, adviser.

Diana Kathleen Elhard, Political Science; Weinberg. *Climate Finance in International Negotiation*; Ian Hurd, adviser.

Eskil Juul Elling, Philosophy; Weinberg. *Hegel on Aesthetic Freedom*; Mark Alznauer, adviser.

Paul Gustav Feller-Simmons, Music; Bienen. *Refining the Sephardic: Music and Jewish Community in the 18th-Century Dutch Republic*; Linda Austern, adviser.

John-Christopher Andrew Finley, Clinical Psychology; Feinberg. *Traumatic Brain Injury, Neuropsychological Functioning, and Risk for Involvement in Community Violence*; Michael Brook, adviser.

Jared Douglas Fletcher, Chemistry; Weinberg. *Synthesis, Structure, Luminescence, and Phase Transitions of Novel Hybrid Metal Halide Perovskites and Perovskite-Adjacent Materials*; Mercouri Kanatzidis, adviser.

Hugo Fernando Flores Garcia, Computer Science; McCormick. *The Neural Tape Loop: Controllable and Expressive Generative Modeling for the Sound Arts*; Bryan Pardo, adviser.

Melanie Ellen Freedman, Clinical Psychology; Feinberg. *A Mixed-Methods Evaluation of a Tailored, Six-Week, Online, Group-Based Positive Psychological Intervention for Bereaved Older Adults*; Judith Moskowitz, adviser.

Nevin Miguel Garcia-Bender, Music; Bienen. *Adolescent Musical Identity in a Developmentally Oriented Middle School Orchestra*; Sarah Bartolome, adviser.

Hendryck Antonio Gellineau, Chemistry; Weinberg. *Cobalt(III) Schiff-Base Complexes as Antibacterial and Resistance Attenuating Agents*; Thomas Meade, adviser.

James K. Gibb, Anthropology; Weinberg. *Biological Embedding of Stigma and the Healthspans of Sexual and Gender Minority Populations: A Biosocial Analysis of the RADAR Observational Cohort Study*; Thomas McDade, adviser.

Esther Margot Ginestet, History; Weinberg. *Communities of Destiny: Historical Imaginations and Intellectual Authority Along the Northeastern Shores of Lake Victoria, 1850s–1980s*; David Schoenbrun, adviser.

Madeleine Goedegebuure, Biomedical Engineering; McCormick. *Regenerative Engineering Grafts for Bladder Reconstruction*; Guillermo Ameer and Arun Sharma, advisers.

Natalie Gonzaga-Saavedra, Interdisciplinary Biological Sciences; McCormick and Weinberg. *The Delineation of Active and Repressed Chromatin States During the* Drosophila *Maternal-to-Zygotic Transition*; Shelby Blythe, adviser.

Elizabeth Good, Political Science; Weinberg. *Willing and Able: Power Dynamics and Women's Representation in Peace Processes*; Jason Seawright, adviser.

Peter Merrill Carpenter Graffy, Health Sciences Integrated Program; Feinberg. *Heat and Hearts: Computational Phenotyping of Cardiovascular Disease in the Context of Extreme Heat*; Norrina Allen, adviser.

Jacob Joseph Graham, Mechanical Engineering; McCormick. *Toward Programmable Biomaterials: Simulating Sequence and Process Effects on the Mechanics of Mussel and Spider Silk Protein-Inspired Materials*; Sinan Keten, adviser.

Stephanie Jean Gregoire, Music; Bienen. *Where Do I Belong: Perceptions of Community and Belonging in Choirs That Coalesce Around Nonmusical Identity*; Sarah Bartolome, adviser.

Yi Gu, Mathematics; Weinberg. *Generalized t-SNE and Beyond: Probabilistic Methods for Dimensionality Reduction, Combinatorial Optimization, and Machine Learning*; Antonio Auffinger, adviser.

Zhaoyi Gu, Chemistry; Weinberg. *Structure, Reactivity, and Function of Megamolecule Proteins*; Milan Mrksich, adviser.

Nicole Irene Guarino, Human Development and Social Policy; Education and Social Policy. *The Contexts That Make Me: Identity-Related Processes and Realizing College Outcomes for Those from Lower Socioeconomic Backgrounds*; Jonathan Guryan, adviser.

Janna L. Guilfoyle, Clinical Psychology; Feinberg. *Understanding Social Communication Differences in Autism: A Family Study of Neural and Sensorimotor Mechanisms*; Molly Losh, adviser.

Felipe Andrés Gutiérrez Franco, Spanish and Portuguese; Weinberg. *Crear tesoros: disputas y estéticas patrimoniales en Colombia y España*; Miguel Caballero-Vázquez, adviser.

Maryam Hedayati, Computer Science and Learning Sciences; Education and Social Policy and McCormick. *The What, How, and Why of Visualization Literacy*; Matthew Kay, adviser.

Kimberly Jiyun Hemmerling, Biomedical Engineering; McCormick. *Advanced Functional MRI Mapping of Human Spinal Cord Functional Anatomy and Vascular Physiology*; Molly Bright, adviser.

Alejandro Hernandez De La Lanza, Operations Management; Kellogg. *Essays on Mobile App Operations Management*; Maria Ibanez, adviser.

Ashley Heywood, Clinical Psychology; Feinberg. *In Vivo Structural Relationships of Postmortem Neurodegenerative Disease*; Lei Wang and James Reilly, advisers.

Andrew Robert Holter, History; Weinberg. *Photography and Police Repression in the United States, 1955–1975*; Kevin Boyle, adviser.

Julia Honoroff, Human Development and Social Policy; Education and Social Policy. *A Multilevel Exploration of Early Care and Education Policy for the 21st-Century Family: How Structure, Process, and Choice Shape Parents' On-the-Ground Experiences*; Terri Sabol, adviser.

Mingyuan Hu, Mathematics; Weinberg. *Skein-Valued Cluster Theory and Open Gromov-Witten Invariants*; Eric Zaslow, adviser.

Vivian Hu, Biomedical Engineering; McCormick. *Engineering Cell-Free Modified Liposomal Platforms for Vaccines and Biosensors*; Neha Kamat, adviser.

Yuxuan Hu, Mathematics; Weinberg. *Elements of Parametrized Sheaf Theory*; Gus Schrader, adviser.

Bridgette Danielle Hulse, Anthropology; Weinberg. *A Prayer of Their Own: Understanding Writing and Worship Through Graffiti in Cathedrals*; Matthew Johnson, adviser.

Stefanie Huttelmaier, Civil and Environmental Engineering; McCormick. *Phage-Hunting in Metagenomes: Using Viromics to Explore Viral Ecology and Host Phage Relationships in Engineered Systems*; Erica Hartmann, adviser.

Andra-Maria Ionescu, Physics and Astronomy; Weinberg. *A Search for Scalar Ultralight Dark Matter Using Optical Cavities*; Gerald Gabrielse, adviser.

Danat Issa, Astronomy; Weinberg. *Unveiling Cosmic Pathways of Heavy Element Nucleosynthesis Through State-of-the-Art Simulations*; Sasha Tchekhovskoy, adviser.

Zhen Jia, Civil and Environmental Engineering; McCormick. *Towards Intensified Resource-Efficient Wastewater Treatment: Innovations in Anammox-Based Simultaneous Nitrogen and Phosphorus Removal Bioprocesses*; George Wells, adviser.

Paulina Jones-Torregrosa, English; Weinberg. *Global Intimacies: Transnational Writings by US Women of Color*; John Alba Cutler, adviser.

Kyle R. Jozsa, Clinical Psychology; Feinberg. *Longitudinal Associations Between Hookup/Dating App Use, Negative Affect, and HIV Risk Behavior Among Young Sexual Minority Men: A Daily-Diary Study*; Michael Newcomb, adviser.

Yuhao Ju, Computer Engineering; McCormick. *Domain-Specific Accelerators and Architectural Optimizations of Machine Learning System-on-Chip for Edge Devices*; Jie Gu, adviser.

Jordan Michael Thomas, Electrical Engineering; McCormick. *Quantum Entanglement and Teleportation Coexisting with Classical Communications in Optical Fiber*; Prem Kumar, adviser.

Anjali Naidu Thota, Civil and Environmental Engineering; McCormick. *Geological and Geotechnical Investigation of Subsurface Urban Heat Islands*; Alessandro Rotta Loria, adviser.

Zuheyra Tokac, Linguistics; Weinberg. *Phonotactic Similarity as a Predictor of Perceived Vowel Similarity*; Jennifer Cole, adviser.

Mitchell James Walker, Materials Science and Engineering; McCormick. *Characterizing and Mitigating Loss in Interfacial Dielectrics in Superconducting Quantum Circuits*; Mark Hersam, adviser.

Brynna Tellas Webb, Interdepartmental Neuroscience; Communication, Feinberg, McCormick, and Weinberg. *Pathological Human Variants in the GRIK2 Kainate Receptor Gene Cause Wide-Ranging Behavioral Dysfunction in Mouse Models*; Geoffrey Swanson, adviser.

Benjamin Weil, Art History; Weinberg. *Representing the City in 14th-Century Italy: Art, Politics, and Civic Identities*; Christina Normore, adviser.

Heather Leanne White, Mechanical Engineering; McCormick. *Molecular Modeling of Rate-Dependent Dissipation Mechanisms in Thin Films Under Microballistic Impact*; Sinan Keten, adviser.

Tabor Lange Whitney, Anthropology; Weinberg. *Using Noninvasive Biomarkers and Human-Wildlife Interaction Surveys as Conservation Tools for the Endangered Mexican Mantled Howler Monkey* (Alouatta palliata mexicana); Katherine Amato, adviser.

Alexa Mauying Wong, Chemistry; Weinberg. *Towards Device-Ready Colloidal Crystals Engineered with DNA*; Chad Mirkin, adviser.

Kelsey Marie Wright, Interdepartmental Neuroscience; Communication, Feinberg, McCormick, and Weinberg. *Reticulospinal Contributions to Shoulder Abduction in Healthy Adults: Load-Dependent Modulation and Suprabrainstem Regulation*; Jun Yao, adviser.

Yuhang Wu, Computer Science; McCormick. *Hardening the Fuzzing Ecosystem Through Automated Seed Generation, Report Deduplication, and Patch Correctness Validation*; Xinyu Xing, adviser.

Yuhao Wu, Chemistry; Weinberg. *Structure-Function Relationships of Gold Nanomaterials for Molecular Sensing*; Teri Odom, adviser.

Degree awarded March 27, 2026

Khalil Jalen Anderson, Computer Science; McCormick. *Designing a Multimodal Collaboration Analytics Tool to Support Students' Collaboration Literacy Development*; Marcelo Worsley, adviser.

Vageesha Bainwala, Economics; Weinberg. *Essays in Development Economics*; Christopher Udry and Dean Karlan, advisers.

Megan Bonham, Sociology; Weinberg. *Experiencing and Preserving Nighttime Darkness*; Christine Percheski, adviser.

Qiankai Cao, Computer Engineering; McCormick. *Energy-Efficient Time-Domain Mixed-Signal System-on-Chip Architectures for AI-Powered Robotics and Neural Network Acceleration*; Jie Gu, adviser.

Ram Prosad Chakrabarty, Driskill Graduate Program in Life Sciences; Feinberg. *Mitochondrial L-2-Hydroxyglutarate Is a Physiologic Signaling Metabolite*; Navdeep Chandel, adviser.

Emily Katherine Chase, Chemical and Biological Engineering; McCormick. *Describing Supported Metal Oxide Surfaces with Site-Specific Characterization*; Justin Notestein, adviser.

Ismael Enrique Coello Ramirez, Materials Science and Engineering; McCormick. *Casting and Additive Manufacturing of Aluminum Alloys with High Creep- and Coarsening Resistance*; David Dunand, adviser.

Tonmoay Deb, Computer Science; McCormick. *Responsible Defense from Multidrone Attacks*; V. S. Subrahmanian, adviser.

Kaitlyn Elizabeth DeMeulenaere, Driskill Graduate Program in Life Sciences; Feinberg. *Microglia Reactivity and Neuroinflammation-Driven Behaviors Are Regulated by Orai1 Calcium Channels*; Murali Prakriya, adviser.

Andrew Igor Efimov, Biomedical Engineering; McCormick. *Wireless, Implantable Optoelectronic Platforms for In Vivo Optogenetic Control of Neuronal Activity in the Gut and Brain*; John Rogers, adviser.

Katherine Elizabeth Erskine, Screen Cultures; Communication. *From Hysteria to Hashtags: The Politics of Mental Distress in Contemporary Television and Digital Media*; Lynn Spigel, adviser.

Fabio Murillo Fasanelli Jr., Chemistry; Weinberg. *Fabrication and Optical Characterization of In-Plane Plasmonic Moiré Nanoparticle Lattices*; George Schatz, adviser.

Hannah Feiner, Communication Sciences and Disorders; Communication. *Interpreter-Mediated Speech-Language Therapy in Early Intervention: Roles, Practices, and Determinants Shaping Family-Centered Care*; Megan Roberts, adviser.

Glenn Jacob Fernandes, Computer Science; McCormick. *Multimodal Wearable Camera Systems for AI-Based Detection of Health Risk Behaviors and Prediction of Outcomes*; Nabil Alshurafa, adviser.

Kevin Shea Fitzgerald, Chemical and Biological Engineering; McCormick. *Engineering Cyanophycin Production for Nitrogen Recovery from Concentrated Waste Streams*; Keith Tyo, adviser.

Stella Alexandra Fors, Chemistry; Weinberg. *Electrosynthesis for Selective Construction and Destruction of Organic Molecules*; Christian Malapit, adviser.

Ellen Marie Fruzyna, Driskill Graduate Program in Life Sciences; Feinberg. *Hepatic BCL6 Directs Interorgan Communication to Regulate Nutrient Metabolism*; Grant Barish, adviser.

Madeleine Ann Gaidimas, Chemistry; Weinberg. *Insights into Rare Earth Metal-Organic Framework Crystallization Enabled by High-Throughput, Automated Synthesis and Characterization*; Omar Farha, adviser.

Guillaume Michel Lucas Gex, Economics; Weinberg. *Essays on Energy Economics*; Bruno Strulovici, adviser.

Elsa Bea Godtfredsen, Plant Biology and Conservation; Weinberg. *Identifying the Intersections: New Realities of Plant Phenology, Physiology, and Demography Under a Changing Climate*; Amy Iler, adviser.

Jamie Nelly Guillen Magaña, Driskill Graduate Program in Life Sciences; Feinberg. *Schlafen 12 Modulation and Targeting in Acute Myeloid Leukemia*; Leonidas Platanias, adviser.

Jiachen Guo, Theoretical and Applied Mechanics; McCormick. *AI-Enhanced Next-Generation Computer-Aided Engineering*; Wing Liu, adviser.

John Patrick Hegarty, Materials Science and Engineering; McCormick. *From Moisture-Swing Carbon Capture to Automated Microplastic Analysis: Pushing Frontiers in the Remediation of Fossil-Fuel-Derived Pollutants*; Vinayak Dravid, adviser.
