Clinical Informatics Specialist (“Ninja”)

Attention recent graduate pre-medical students and others interested in a career in medicine, healthcare. Oak Street Health is hiring Clinical Informatics Specialists to assist in supporting the clinical experience in our clinics and obtaining/structuring/employing data to the benefit of our patients.

The goal of this position is to be the personal data assistant to the physician. This means you handle informatics responsibilities for physicians during patient visits in our centers. A large part of the position will be to observe and record patient encounters, document patient information, and assist in medical management. Clinical Informatics Specialists process physician orders for tests and medications and record physical examinations, patient histories, consultations with other providers, and document diagnoses. Clinical Informatics Specialists are trained to be experts in structured clinical assessments, accurate and specific documentation, population health workflows, and team based care. A major goal will be to also facilitate efficient and effective medical care for our patients.

We start simple: build meaningful relationships with patients and their families, then layer on resources to help our teams provide excellent care. Our facilities are all new and designed around a model of comprehensive, personalized primary care. We emphasize the use of technology to improve care quality and make life easy for our providers. We are a team of highly motivated, work hard/play hard individuals who believe in the mission of providing excellent primary care.

Why Oak Street Health?

- We offer a fast-paced team based environment with many driven, energetic coworkers.
- You will be surrounded by physician mentorship from physicians with training backgrounds ranging from Harvard, University of Chicago, Northwestern, and NYU among other elite institutions.
- We offer performance bonuses to reward Clinical Informatics Specialists who excel at supporting our mission.
● No required certifications, licenses or registrations for employment. The prerequisites are passion for medicine, willingness to learn, and energy to take primary care to a new level.
● Previous medical experience of some kind preferred but not required.

We Expect:

● Applicants committed to ongoing learning that are interested in a full time short-term (1 year) or longer term opportunities. We are especially interested in recent graduate/gap year/deferred acceptance premedical students looking to gain practical, paid experience in a patient care setting prior to applying to medical, dental, nursing, or physician assistant school.
● Advanced communication skills.
● Ability to type 70+ words per minute.
● Basic level of medical knowledge and/or a willingness to learn quickly.
● Ability and willingness to take direction and be a member of a team providing patient care.
● Excellent job attendance. (Our physicians count on you.)
● Ability to work approximately 40-45 hours per week (full time position) with predictable hours and protected break times.
● Compliance with hospital and Oak Street Health policies, including HIPAA.
