

Are Your Medications Too *Expensive*?

Research participants are needed for a study* that seeks to better understand how cost affects prescription drug use among seniors.

Are you eligible? We are seeking people aged 65 years and older who speak English, are currently taking 3 or more prescription medications and have had any difficulty paying for them.

Participants will be interviewed for 60 minutes at the Buehler Center on Aging. You will be asked to show all the medications you are currently taking, and to bring a printout of all prescriptions filled within the last 6 months (available from your retail pharmacy). Questions from the interview will be based on these drugs.

You will be compensated \$20 for your time and travel.

If you are interested in taking part in this study, please contact Charles Osterberg by phone at (312) 503-2559, or email costerberg@md.northwestern.edu.

* Study Title: *Cost Effects on Medication Use among Older Adults*
Principal Investigator: Denys Lau, Ph.D.
