

METTLER-TOLEDO CALIBRATION WEEK

May 22-25, 2017

If your lab has balances, scales, or pH meters, you can have them maintained through Mettler-Toledo's calibration program. In addition to any Mettler-Toledo devices, Mettler-Toledo can service a variety of manufacturers' devices.

Preventative maintenance services include balance and scale cleaning, calibration, adjustments, and minor repairs.

Services are billed to your department/school chart string at \$75 per unit. Upon receipt of your Calibration Request Form, a company technician will promptly contact you to schedule an appointment. **Register by May 18.**

For questions about calibration services, please contact Ellen Barnes at 1-3274 or visit: northwestern.edu/auxiliary-services
