Northwestern University

One Hundred and Sixty-Third
Annual Commencement

11 A.M. CDT, MONDAY, JUNE 14, 2021
Soon after Northwestern University was founded, its Board of Trustees adopted an official corporate seal. This seal, approved on June 26, 1856, consisted of an open book surrounded by rays of light and circled by the words Northwestern University, Evanston, Illinois.

Thirty years later Daniel Bonbright, professor of Latin and a member of Northwestern’s original faculty, redesigned the seal, retaining the book and light rays and adding two quotations. On the pages of the open book he placed a Greek quotation from the Gospel of John, chapter 1, verse 14, translating to The Word... full of grace and truth. Circling the book are the first three words, in Latin, of the University motto: Quaecumque sunt vera (Whatsoever things are true). The outer border of the seal carries the name of the University and the date of its founding. This seal, which remains Northwestern’s official signature, was approved by the Board of Trustees on December 5, 1890.

The full text of the University motto, adopted on June 17, 1890, is from the Epistle of Paul the Apostle to the Philippians, chapter 4, verse 8 (King James Version).

Whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things.

TO OUR GUESTS

Commencement is the highlight of the academic year. It is that significant occasion, both solemn and joyful, when we honor those students who have completed their courses of study. Commencement is important to all of you, the University, and its faculty, staff, and students. While the University respects the rights of all to express their views, we respectfully expect and require that any such expressions during these Commencement proceedings not disrupt the virtual ceremony nor prevent others from enjoying it.

Once the virtual Commencement ceremony has concluded, a link to the recording will be available on Northwestern’s Commencement website.

The website also contains a link to an order form for printed copies of the 2021 Commencement program booklet, which will contain all the material in this electronic document plus a listing of the graduates’ honors and awards. The booklet will be printed and mailed later this summer.

Hail to Alma Mater!
We will sing thy praise forever;
All thy sons and daughters
Pledge thee victory and honor.
Alma Mater, praise be thine,
May thy name forever shine!
Hail to Purple! Hail to White!
Hail to thee, Northwestern!

Quaecumque sunt vera,
Proba, justa, mera
Omnia haec dona
Praebes nobis bona,
Alma mater cara,
Benedicta, clara,
Celsa in honore
Nostro et amore!

MORTON SCHAPIRO

President

Morton Schapiro began his term as the 16th president of Northwestern University on September 1, 2009. He is a professor of economics in Northwestern's Judd A. and Marjorie Weinberg College of Arts and Sciences and also holds appointments in the J. L. Kellogg School of Management and the School of Education and Social Policy.

President Schapiro is among the nation's leading authorities on the economics of higher education, with particular expertise in the area of college financing and affordability and on trends in educational costs and student aid. He has been a regular commentator in the national media on those and other issues.

Previously President Schapiro was president of Williams College from 2000 to 2009. Earlier he had served as a member of the Williams College faculty from 1980 to 1991 as professor of economics and assistant provost. In 1991 he went to the University of Southern California, where he served as chair of the economics department until 1994 and then as dean of the College of Letters, Arts and Sciences until 2000. During his last two years as dean, he also served as the university's vice president for planning.

President Schapiro has written more than 100 articles and authored or edited 10 books, most recently Minds Wide Shut: How the New Fundamentalisms Divide Us (with Gary Saul Morson, Princeton University Press, 2021). He has received research grants and contracts from the National Science Foundation, the US Department of Education, the World Bank, the Andrew W. Mellon Foundation, the Spencer Foundation, the College Board, the Organization for Economic Cooperation and Development, and other groups to study the economics of higher education and related topics. In 2010 he was elected a fellow of the American Academy of Arts and Sciences, and in 2017 he was elected to the National Academy of Education.

He received his bachelor’s degree in economics from Hofstra University and his doctorate from the University of Pennsylvania.

J. LANDIS MARTIN

Chair, Board of Trustees

J. Landis Martin is the chairman and managing director of Platte River Equity, a Denver-based private equity firm focused on lower-middle-market companies. He retired as chairman and CEO of Denver-based Titanium Metals Corporation, one of the world's largest producers of titanium metal, in 2005. Mr. Martin is also the chairman of the board of Houston-based Crown Castle International Corporation, a communications infrastructure provider. Until 1987 he was also a partner at the Kirkland & Ellis law firm.

Mr. Martin is chairman of the Denver Art Museum and its foundation and of the Clyfford Still Museum Foundation. He is chairman emeritus of Central City Opera House Association and past chairman and president of the Houston Grand Opera.

In addition to chairing Northwestern University’s Board of Trustees, Mr. Martin is a member of the Northwestern Pritzker School of Law Board. He received a bachelor of science degree in business administration from Northwestern and a juris doctor degree from Northwestern Law.

LAND ACKNOWLEDGMENT

To recognize the land is an expression of gratitude and appreciation to those whose territory we reside on—and a way of honoring the Indigenous people who have been living and working on the land from time immemorial. It is important to understand the long-standing history that has brought us to reside on the land and to seek to understand our place within that history.*

The Northwestern campus sits on the traditional homelands of the people of the Council of Three Fires—the Ojibwe, Potawatomi, and Odawa—as well as the Menominee, Ho-Chunk, and Miami tribes. It was also a site of trade, travel, gathering, and healing for more than a dozen other Native tribes; the state of Illinois is still home to over 100,000 tribal members.

Consistent with the University's commitment to diversity and inclusion, Northwestern works toward building relationships with Native American communities through academic pursuits, partnerships, historical recognitions, community service, and enrollment efforts.

HISTORY OF NORTHWESTERN

The founding of Northwestern University by nine Methodists embodied a mixture of religious conviction and secular optimism that is uniquely American. Meeting above a hardware store in the burgeoning frontier town of Chicago, these nine resolved on May 31, 1850, to establish an institution of “the highest order of excellence.” The 1851 Act of Incorporation creating Northwestern University contained a provision reflecting the strong religious beliefs of its founders but requiring no particular religious faith of students or members of the faculty.

In 1853 the University bought and began to develop 379 acres of lakeshore farmland. The town that grew up around Northwestern was named for John Evans, one of the University’s founders. By 1855 Northwestern had completed its first building and opened a College of Liberal Arts. By 1900 the University encompassed six additional schools, including the medical and law schools in Chicago. Since the establishment of the Graduate School in 1910, Northwestern has provided graduate as well as undergraduate instruction, emphasizing research along with teaching.

The University’s development since then has paralleled the growth of metropolitan Chicago. Today Northwestern is a private research university of distinction, with 11 academic divisions located on two lakefront campuses in Evanston and Chicago as well as Northwestern University in Qatar, which opened in Doha in 2008. Northwestern’s vision of excellence—although faithful to its founding—invigorates a territory far beyond the old Northwest Territory through the accomplishments of its alumni and by virtue of a distinguished faculty and high-achieving student body drawn from across the nation and around the world.

SCHOOLS OF THE UNIVERSITY

The Judd A. and Marjorie Weinberg College of Arts and Sciences, established in 1851 as the College of Liberal Arts, offers the degree of bachelor of arts. Through the School of Professional Studies, Weinberg College also offers the degrees of bachelor of philosophy and bachelor of science in general studies.

The School of Communication, established in 1878 as the School of Oratory and later renamed the School of Speech, offers the degrees of bachelor of arts, bachelor of science, doctor of audiology, doctor of speech-language pathology, master of arts, and master of science. Through the School of Professional Studies, the School of Communication also offers the degree of bachelor of philosophy in communication.

The School of Education and Social Policy, established in 1926 as the School of Education, offers the degrees of bachelor of science and master of science.

The Robert R. McCormick School of Engineering and Applied Science, established in 1909 as the College of Engineering, offers the degrees of bachelor of science, master of engineering management, and master of science.

The Graduate School, established in 1910, administers programs leading to the degrees of doctor of philosophy, master of arts, master of fine arts, master of public health, and master of science.

The Medill School of Journalism, Media, Integrated Marketing Communications, established in 1921 as the Medill School of Journalism, offers the degrees of bachelor of science and master of science.

The Pritzker School of Law, established in 1859 as the School of Law, offers the degrees of juris doctor, master of laws, master of science in law, master of studies in law, and doctor of juridical science. The school also offers the Master of Laws International Executive Master’s Program in Israel, South Korea, and Spain.

The J. L. Kellogg School of Management, established in 1908 as the School of Commerce, offers the degrees of master of business administration and master of science in management studies. In addition to the Full-Time MBA program, Kellogg offers the Evening and Weekend MBA program on the Chicago campus, the Executive Master’s Program in Evanston and Miami, and the International Executive Master’s Program in Canada, China (Beijing and Hong Kong), Germany, and Israel.

The Feinberg School of Medicine, established in 1859 as the Medical School, offers the degrees of bachelor of science in medicine, master of medical science, master of prosthetics and orthotics, doctor of medicine, and doctor of physical therapy.

The Henry and Leigh Bienen School of Music, established in 1895 as the School of Music, offers the degrees of bachelor of music, bachelor of arts, and bachelor of science. In its graduate division, the school offers the degrees of doctor of musical arts and master of music.

The School of Professional Studies, established in 1933 as University College and later renamed the School of Continuing Studies, offers the degrees of master of arts, master of fine arts, and master of science. The school also offers courses leading to the degrees of bachelor of philosophy and bachelor of science in general studies, conferred by the Weinberg College of Arts and Sciences, and the degree of bachelor of philosophy in communication, conferred by the School of Communication.

Northwestern University in Qatar, established in 2008 as part of Education City in the Qatari capital of Doha, offers the degree of bachelor of science in communication through the School of Communication and the degree of bachelor of science in journalism through the Medill School of Journalism, Media, Integrated Marketing Communications.
ACADEMIC DRESS

Modern academic attire originated in the medieval universities of Europe, where gowns were worn daily to provide warmth in poorly heated buildings and to differentiate scholars from fellow citizens. Two English universities, Oxford and Cambridge, are particularly noted for developing the authentic academic costume, which has changed only slightly through the centuries.

In the United States most academic dress follows the general provisions of the Intercollegiate Code of 1895, which was revised in 1932 and again in 1959. Under this code the gowns’ trim and sleeve design indicates the level of the degree. The bachelor’s gown has pointed sleeves and is worn closed; the master’s gown has oblong sleeves with an arc at the bottom and may be worn open or closed; and the doctor’s gown, which may also be worn open or closed, has velvet facings down the front and three velvet bars on the bell-shaped sleeves. This velvet trim may be black or the prescribed color of the academic area. Though the recommended color for gowns is black, Northwestern University (like many institutions) has adopted a colored gown to reflect the school’s color. All participating candidates wear a custom purple gown featuring the University crest.

The style of hood identifies the level of the degree, the school that granted it, and the academic area. Hood length and border width show the level of the degree. The bachelor’s hood, which is optional and not worn at Northwestern University, is three feet in length; the master’s, three and one-half feet; the doctor’s, four feet. The velvet border of the hood is two, three, and five inches wide for the bachelor’s, master’s, and doctor’s degrees, respectively. The hood is lined with silk in the official color of the school. At Northwestern the hood is lined in purple (the school’s color) and gold. The color of the hood’s border—and at Northwestern the color of the cap’s tassel as well—indicates the academic area. Tassels feature the Northwestern seal signet and are worn on the left side at all times. At Northwestern the colors for the Graduate School constitute an exception; tassels are black, but the border color of the hood indicates the specific degree awarded. Bachelor’s degree regalia include a souvenir stole.

The square black mortarboard is the recommended cap, although some schools have adopted other styles. Caps are worn throughout the Commencement ceremony, except that men remove them for the national anthem, invocation, and benediction.

At Northwestern University members of honor societies may be recognized by the honor cords, medallions, and stoles worn.

TARANA J. BURKE  
**Doctor of Humane Letters**

For decades, Tarana J. Burke has led campaigns and launched initiatives to address such issues as housing inequality, racial discrimination, sexism, and economic injustice. After graduating from Alabama State University, she began working in Selma, Alabama, with the youth development organization 21st Century. Focusing on supporting young women of color, she cofounded Jendayi Aza, an African-centered rites-of-passage program for girls that evolved into her nonprofit organization JustBe. A survivor of sexual assault, she founded the Me Too movement to promote “empowerment through empathy,” and a decade later her #MeToo hashtag went viral. Burke has served as managing director of Philadelphia’s Art Sanctuary, executive director of the Black Belt Cultural Arts Center, a curatorial consultant and special projects director at the National Voting Rights Museum and Institute, and a consultant on Ava DuVernay’s film Selma. In 2017 she was featured in *Time* magazine’s Person of the Year issue honoring “silence breakers,” and the following year *Time* named her one of the world’s 100 most influential people. A widely published commentator, she is the senior director of Girls for Gender Equity in Brooklyn, New York.

HELEN H. HOBBS  
**Doctor of Science**

Helen H. Hobbs is professor of internal medicine and molecular genetics, chief of the Division of Medical Genetics, and director of the McDermott Center for Human Growth and Development at the University of Texas Southwestern Medical Center. She is also an investigator for the Howard Hughes Medical Institute and the director of the groundbreaking Dallas Heart Study. Focusing her research on the genetic determinants of plasma lipid levels and cardiovascular risk, she has identified a genetic variation that protects against heart disease and another that produces susceptibility to fatty liver disease. A member of the National Academy of Sciences, National Academy of Medicine, and American Academy of Arts and Sciences, Hobbs has received the American Society for Clinical Investigation Harrington Prize for Innovation in Medicine, the Breakthrough Prize in Life Sciences, the American Heart Association’s Distinguished Scientist Award, the New York Academy of Medicine’s Glorney-Raisbeck Award, the inaugural International Society of Atherosclerosis Prize, the Pasarow Foundation Award in Cardiovascular Research, and Rockefeller University’s Pearl Meister Greengard Prize. She earned a BA in human biology at Stanford University and an MD at Case Western Reserve University.

GEORGE R. R. MARTIN  
**Doctor of Humane Letters**

George R. R. Martin began writing as a child and sold his first story at age 21, to *Galaxy Science Fiction* magazine. Since then he has written 12 published novels in addition to writing and editing numerous short-story collections. After earning a BS with highest distinction and an MS in journalism at Northwestern University, Martin worked for the Cook County Legal Assistance Foundation, directed tournaments for the Continental Chess Association, and taught writing at Iowa’s Clarke College. As a writer in Hollywood, he was a story editor for CBS Television’s *The Twilight Zone* and successively an executive story consultant, producer, and supervising producer for CBS’s *Beauty and the Beast*, among other credits. His novel *A Game of Thrones*, published in 1996, initiated his *A Song of Fire and Ice* series, for which he has now completed five of seven planned volumes. HBO began airing its multi-Emmy-winning *Game of Thrones* series in 2011, the year *Time* magazine named Martin one of the world’s 100 most influential people. Winner of numerous Locus and Hugo fiction awards, he received the 2012 World Fantasy Award for Life Achievement.

*Presented by Roger Boye, associate professor emeritus-in-service of journalism, Medill School of Journalism, Media, Integrated Marketing Communications*

The depth and brilliance of your imagination have transported us to entirely new worlds. Both in print and on television, your stories and characters have fascinated millions. Your many awards testify to your preeminence in the field of science fiction and fantasy. We are proud to claim you as one of our own.

GWYNNE SHOTWELL  
**Doctor of Science**

Gwynne Shotwell is the president and chief operating officer of SpaceX, responsible for day-to-day operations and for management of customer and strategic relations to support company growth. Also a member of SpaceX’s board of directors, she joined the company in 2002 as vice president of business development. Previously she held positions in space systems engineering, technology, and project management during a decade with the Aerospace Corporation. Named the 2018 Satellite Executive of the Year, Shotwell has received the Von Karmen Wings Award, the American Institute of Aeronautics and Astronautics’ Goddard Astronautics Award, and the American Society of Mechanical Engineers’ Ralph Coats Roe Medal. In 2020 she was inducted into the National Academy of Engineering and named one of *Time* magazine’s 100 most influential people. She has also appeared on *Fortune* magazine’s list of the world’s 50 greatest leaders and *Forbes* magazine’s list of power women. In 2019 she was appointed to the National Space Council Users’ Advisory Group. Shotwell earned a BS in mechanical engineering with honors and an MS in applied mathematics at Northwestern University.

*Presented by Kevin Lynch, professor of mechanical engineering and director of the Center for Robotics and Biosystems, Robert R. McCormick School of Engineering and Applied Science*

Your leadership and creativity have opened the realm of space exploration to commercial innovation. You have achieved equal prominence in promoting STEM education, raising more than $1.8 million for programs nationwide. You have generously served your alma mater as a campus speaker, advisory board member, and member of our Board of Trustees. We are proud to welcome you back and grateful for all you have done to expand our horizons.
Seth Brady has taught at Naperville Central High School in Naperville, Illinois, since 2004. In addition to teaching courses on comparative religions, peace and conflict studies, and world cultures, he sponsors the school's Muslim Student Association, Indian Student Association, and Black and Latino Leadership Council. Since 2015 he has also been a religious studies standards and curriculum writer. As liaison between the National Council for Social Studies and project director for Illinois Global Scholar since 2014, he has coordinated four statewide summits and helped produce legislation establishing a state-level global education certificate. Brady has also taught as an adjunct professor at Waubonsie Community College and the International Academy of Design and Technology. Winner of the Alan D. Krashesky Literacy Prize and Farmers Insurance's Dream Big Teacher Challenge, he has been named the Prairie Rivers Network's Steward of the Year and Naperville Community Unit School District 203's Teacher of the Year. He has given presentations at education-related conferences and symposiums across the United States and at the 2013 International Conference on Religion in Indonesia. Student nominator Mahie Gopalka of the Weinberg College of Arts and Sciences says that Brady's "passion for global education shaped the way I now understand my own purpose in life." Brady earned an MA in social science at the University of Chicago and a BA in anthropology and philosophy and an MS in kinesiology at the University of Illinois at Urbana-Champaign.

Carrie Marcantonio has taught since 2010 at Winnetonka High School in Kansas City, Missouri, where she is the gifted resource specialist, Advanced Placement research and seminar instructor, AP and AP Capstone Diploma coordinator, Golden Medallion Honors Diploma coordinator, and Key Club sponsor. She conceived and led Winnetonka's Challenge Program, which in only one year almost doubled student AP participation while ensuring that enrollment mirrored the school's racial demographics. In addition, she serves as equity and inclusion coordinator and district PSAT training co-coordinator for the North Kansas City School District. Previously Marcantonio taught at Kansas City's Oak Park High School and at schools in California and Colorado. Winner of Winnetonka's Big T teaching award, she was selected for the Superintendent's Leadership Institute and was recognized as an outstanding teacher in three consecutive years by the Missouri Scholars Academy. Student nominator Emanuella Evans of the Medill School of Journalism, Media, Integrated Marketing Communications says that Marcantonio "encouraged me to be confident in myself, confident in my intelligence, and confident in my impact, all things foundational to the woman I am today." Currently pursuing a doctorate in education at Baker University, Marcantonio earned a BS in education at Texas Christian University, an MA in secondary English education at the University of San Diego, and a certificate in gifted education at the University of Missouri.

Monica Rowley has taught humanities and Advanced Placement research since 2009 at Brooklyn Technical High School in Brooklyn, New York, where she is responsible for humanities curriculum development and advises the Brown Girls Unite, Peer Tutoring, and Animal Advocacy student groups. She also works with the New York City Literacy Department to train teachers across the city, and since 2014 she has been a consultant and trainer for the College Board AP Capstone Program. Previously she taught at Brooklyn's Secondary School for Journalism and at schools in Philadelphia and Honolulu. Among her honors are a Library of Congress Summer Teacher Residency Award, a National Endowment for the Humanities grant, a Gilder Lehrman Fellowship, a Cullman Center Summer Teacher Fellowship, and an Academy for Teachers Fellowship and Roxanne McCormick Leighton Endowed Fellowship for the Bread Loaf School of English. A published poet whose work has appeared in *Ogham Stone* and *Yes Poetry*, she is a member of the Academy for Teachers Educational Board. Grateful for "the writing, research, and life skills Rowley generously imparted," student nominator Chloe Wong of the Weinberg College of Arts and Sciences calls her "the most phenomenal teacher I have ever met." Rowley received a BA in English and religious studies from the University of Dayton, an MA in Asian religions from the University of Hawaii at Manoa, and an MS in secondary education from the University of Pennsylvania.

Jeff Solin has taught computer science engineering since 2003 at Chicago's Lane Tech College Prep High School. He implemented and continues to teach the Chicago Public Schools' only college-level computer architecture course and teaches CPS's only dedicated making course. In Solin's 2017 Chicago Flag Mosaic Project, students in his Makers Lab created a 126-tile 3D mosaic that was displayed at Navy Pier and the Museum of Science and Industry. Previously he taught at Chicago's Northside College Preparatory High School and as a visiting lecturer at the University of Illinois at Chicago. A K–12 National Board Certified Master Teacher, Solin has received the National Center for Women and Information Technology's Aspirations in Computing State and National Educator Awards, the University of Chicago's Outstanding High School Teacher Award, the National Society of High School Scholars Claes Nobel Educator of Distinction Award, and a 2014 National Science Foundation Award as one of the country's top 100 computer science teachers. Last year his pro bono design of the Solin Flatpack Face Shield as pandemic protection for healthcare workers received widespread media coverage. Student nominator Lazar Gueorguiev of the McCormick School of Engineering and Applied Science says that Solin "fostered an environment of collaboration and creativity" that "changed the way I view what a classroom is." Solin earned a BS in computer science at Ohio State University and an MS in educational leadership at the American College of Education.

Mark Vondracek has taught physics since 1998 at Evanston Township High School in Evanston, Illinois, where he coaches and advises academic teams, maintains the ETHS Research Center, and advises student research projects for national competitions. For two decades he also taught physics for Northwestern's Center for Talent Development. Previously he taught at Chicago's Amundsen High School and Yeshivas Brisk Academy. Winner of the University of Chicago's Outstanding Educator Award, Williams College's Olmsted Prize, Massachusetts Institute of Technology's Inspirational Teacher Award, the Illinois State Board of Education's Award of Excellence, two American Association of Physics Teachers Excellence in Physics Teaching Awards, and the ETHS Teacher Excellence Award, he was named the Contemporary Physics Education Project National Teacher of the Year, a National Society of High School Scholars Claes Nobel National Top Ten Educator of the Year, and ETHS Teacher of the Year. As a Global Teacher Prize Top 50 Finalist and Ambassador, he has involved students in national and global collaborative projects. Author of over 120 articles in peer-reviewed journals, he also served as president of the Woodland School District 50 Board of Education. Student nominator Noah DeMar of the McCormick School of Engineering and Applied Science says that Vondracek "gave his students the foundation to succeed anywhere they went after graduation." Vondracek received a BS and MS in physics and a PhD in high-energy physics from the University of Illinois at Urbana-Champaign and earned his teacher certification at DePaul University.
Dear Graduates,

There is a Northwestern tradition that the 50th reunion class participates in Commencement. I delivered remarks at my own Commencement 50 years ago. This year, the Class of 1971 nominated me to share my thoughts with you as part of the 2021 virtual ceremony. Here goes...

Congratulations! You are about to start the next exciting phase of your life. Before you continue reading, please take a few deep breaths if you are able and imagine you and I are sitting down in my living room chatting. Okay, are you relaxed? Let's go.

You have been changed by being at Northwestern. You have made new friends and learned things about yourself while gaining a first-class education at one of the world's best universities. Now what?

There are three areas of your life that I would like to emphasize: the nation, your friends and family, and your self.

The Nation
In 1971, graduates lived in a world at war. Classmates from high school and college were sent to Vietnam. Some did not come home. In 2021, you graduates also face a set of complex realities and questions. Does the US still believe in democracy? Is white supremacy driving attempts to suppress the vote? Will we stop destroying our planet? Will a divided US ever find common ground? Are we in the middle of a second Civil War? Do Black Lives Matter?

As graduates of Northwestern, you will all have a part to play in answering these questions.

Until recently, most of us took democracy for granted. Some Americans feel that the 2020 election was illegitimate—despite the fact that every court rejected those charges and state officials around the country certified the election of Joe Biden and Kamala Harris. The US Capitol was invaded. Bills have been introduced in state legislatures around the country seeking to restrict the ability to vote. These measures are aimed at limiting the political power of voters of color. What will you as informed members of the body politic do? Some of you live in states where voter suppression laws are being considered. There is a federal bill that aims to protect the right to vote. Please contact your congressperson and senators and urge them to support this important legislation.

The country is addressing race in a real way after the murder of Mr. George Floyd, yet unarmed Black men and women continue to be killed by the police in numbers disproportionate to our population. Please find out if there are concrete proposals in your town to address these killings. Speak up and speak out. Urge your family members and friends to do the same. For the past year, we have heard a lot about a racial reckoning. Make sure these are not just empty words and meaningless platitudes.

Generations before yours are responsible for global warming and the destruction of this beautiful planet and its inhabitants. Push us to do more, to do something to make things better. Electric cars. Carbon credits. Many of you will have children, and you will want them to know that you did all you could to preserve Mother Earth.

Get involved. Run for your local school board. Run for city council. Become the first president of the United States who is a Wildcat.

Your Friends and Family
One thing I heard when I lived at Northwestern was that the friends you make here will be friends for life. This is wonderfully true.

Keep in touch with the friends you have made here. Your shared experience in the pandemic will bond you for life. When we can all travel again, go out of your way to visit the people you know and love. I am still close friends with people I met 50 years ago. Make the effort.

My classmates are slowly but surely losing our parents. Make sure your loved ones know that you love them and appreciate all they have done for you. Make sure they tell you all the stories of their lives. Record them if you can. Someday they will not be around.

Be kind. Have a heart and soul filled with love. Do not burn bridges. Make sure that in 50 years, most of the people you have encountered will think well of you.

Your Self
Most of you have become independent people untethered from the expectations of your family. You will be stepping out into the world on your own. Here are some things I would recommend. (Remember, we are in my living room chatting.)

Take care of your body, soul, and mind. You will likely live to be 90 years old, so remember to exercise and eat well. You will likely encounter challenges in your life. There will be times when you are confused or troubled. Reach out for help. The first time I went to a therapist was when I was a junior at Northwestern. I learned a lot about myself and was able to make different, healthier choices. When I started college, I wanted to be a psychologist, and I still think that our inner lives can always be improved or better understood.

Believing in a Higher Power is key to my inner tranquility, inner peace, and joy. When I entered Northwestern, I was a Christian, but I lost my faith while here. I now am a Christian again. That is a very common progression—from faith to doubt and back to faith. There will be many times when faith can help you get through despair and grief.

Pick a career or livelihood that gives you pleasure. Having a job that fulfills you and provides psychic income is so important.

Start saving now for your retirement.

Before you leave my living room, I just want to tell you that life is good. I am sending love and light to you all. Go ‘Cats!

Captain Robert Klassky, USN, Commanding Officer, Professor of Naval Science

Ensign, United States Navy

Candidates for commission, June 14, 2021

Nicolais Henrique Aguilar  
Dylan Thomas Utterback
Wei Ting Chen, Interdisciplinary Biological Sciences; McCormick and Weinberg. Investigating the Mechanisms of Mmr1 in Mitochondrial and mtDNA Inheritance; Laura Lackner, adviser.

Yanni Chen, Civil and Environmental Engineering; McCormick. An Initial Analysis of Strain Rate Growth in Variously Saturated Soil Systems Subjected to Wetting; Giuseppe Buscarrerina, adviser.

Meredith Ruth Ann Craven, Clinical Psychology; Feinberg. Identifying the Risk and Protective Factors of Anxiet y and Depression in Inflammatory Bowel Disease; Laurie Keef er, adviser.

Praarthana Jignesh Dalal, Driskill Graduate Training Program in Life Sciences; Feinberg. Endothelial Cell IQGAP and Calmodulin Kinase II Regulate Leukocyte Transendothelial Migration during Inflammation; William Muller, adviser.

Karen Anne DeRocher, Materials Science and Engineering; McCormick. The Hierarchical Structure and Graded Chemical Distribution of Human Enamel; Derk Joester, adviser.

Mark Julian Diaz, Technology and Social Behavior; McCormick. A Three-Parameter Design Space for Fine Texture Display; Ed Colgate, adviser.

Mohwanah Fetus, English; Weinberg. Geographies of Memory and Pleasure in 20th/21st Century Black Literatures; Alexander Wellehise, adviser.

Khushayvar Filom, Materials Science and Engineering. Entropy Behavior of Real Rational Maps; Laura DeMarco, adviser.

William Forest FitzSimons, History; Weinberg. Distributed Power: Climate Change, Elderhood, and Republicanism in the Grasslands of East Africa, c. 500 BCE to 1800 CE; David Schoenbrun, adviser.

Spencer Florence, Computer Science; McCormick. A Convergent Calculus for Esters; Robby Findler, adviser.

Noah Ford, Engineering Sciences and Applied Mathematics; McCormick. Modeling Large-Scale Dynamics and Intercellular Communication in Bacterial Biofilms; David Chopp, adviser.

Anthony Martin Garcita, Driskill Graduate Training Program in Life Sciences; Feinberg. Uncovering Modifiers of Cardiomyopathy in the Noncoding Genome; Jazhyuk Choi, adviser.

Laura Garcia Montoya, Political Science; Weinberg. Trapped by Inequality: The Politics of Redistribution in Latin America; James Mahoney, adviser.

Ritika Giri, Interdisciplinary Biological Sciences; McCormick and Weinberg. Stochastic Noise in Gene Expression Impacts Developmental Self-Organization; Richard Carthew, adviser.

Julian Kevon Glover, African American Studies; Weinberg. To Be Real: Black and Latinx Transgender Women in the Ballroom Scene; E. Patrick Johnson, adviser.

Ilya Alexander Gokhman, Media, Technology, and Society; Communication. Ripening or Rotting? Examining the Temporal Dynamics of Team Discussion and Decision-Making in Long-Term Teams; Leslie DeChurch, adviser.

Livia Anna Guadagnoli, Clinical Psychology; McCormick. Optimizing and Maintaining Central Hypervigilance in a Cohort of Gastroesophageal Reflux Disease Proton-Pump Inhibitor Nonresponders; Laurie Keef er, adviser.

Kejoan Han, Industrial Engineering and Management Sciences; McCormick. Leveraging Structure of Uncertainty for Adaptive Policies in Multistage Decision-Making; Omid Nohadani, adviser.

Catherine Emily Harrington, Screen Cultures; Communication. Consuming Confinement: Real Prisons on Screen, 1970–Present; Lynn Spigel, adviser.

Molly Suzanne Hermiller, Interdepartmental Neuroscience; Communication, Feinberg; McCormick, and Weinberg. Testing the Role of Theta Burst for Hippocampal-Dependent Episodic Memory via Noninvasive Brain Stimulation; Joel Voss, adviser.

Ole Hexel, Sociology; Weinberg. Inter Vivos Transfers in European Countries (2004–2017); Lincoln Quillilan, adviser.

Briona Paige Hightower, Media, Technology, and Society; Communication. The Technology, Learning, and Aspirational Environments of Working Class Children; Ellen Wartella, adviser.

Kelsey Rose Howard, Clinical Psychology; Feinberg. Exploring the Role of Family in the Development, Treatment, and Long-Term Outcomes of Adolescent Depression; Mark Reinecke, adviser.

Xia Hua, Materials Science and Engineering; McCormick. First-Principles Study of Thermodynamics in Thermoelectric Materials; Christopher Wolverton, adviser.

Lililang Huang, Materials Science and Engineering; McCormick. Multimetallic Nanostructures: Design, Synthesis, and Application as Electrocatalysts; Chad Mirkin, adviser.

Ruslan Huang, Materials Science and Engineering; McCormick. High-Throughput Characterization of Oxides' Electrochemistry; Sossina Haile, adviser.

Nancy Chia Lea Lao, Clinical Psychology; Feinberg. Association between Minted Cigarette Use and Human Cognitive Task Performance; Brian Hitsman, adviser.

Xi Jiang, Industrial Engineering and Management Sciences; McCormick. Reducing and Measuring Input Delays in Stochastic Simulation; Barry Nelson, adviser.

Haleh Karbasforoushan, Interdepartmental Neuroscience; Communication, Feinberg; McCormick, and Weinberg. Identifying Altered Sensomotor Pathways and Their Role in Motor Impairment Post-Stroke; Julius Dewaal, adviser.

Hyun Jin Kim, Physics and Astronomy; Weinberg. Design and Analysis of Neural Networks Using Information-based Schaw; adviser.

Peter Barone Kleinhenz, Mathematics; Weinberg. Decay Rates for the Damped Wave Equation on the Torus; Jared Wunsch, adviser.

Alexandra Nichole Kolberg-Edelbrock, Biomedical Engineering; McCormick, and Weinberg. Some Applications of Perverse Sheaves in Algebraic Geometry; Paul Hacking, adviser.

Yijun Liao, Chemistry; Weinberg. Investigation of Metal-Organc Frameworks in Chemical Separations through Theory and Experiment; Shuli Liu, adviser.

Shanfu Liu, Chemistry; Weinberg. Selective Oxidation of Light Alkanes Using Sulfur as a "Soft" Oxidant; Tobin Marks, adviser.

Sida Lu, Civil and Environmental Engineering; McCormick. Integrated Design and Analysis of Hybrid Multimodal Mobility Systems; Yu Nie, adviser.

Polina Aleksandrovna Maksimovich, Slavic Languages and Literatures; Weinberg. Performing Suicide: Transformation of the Superfluous Man in Soviet Drama; Nina Gurianova, adviser.

Jordan Leigh Manes, Interdepartmental Neuroscience; Communication, Feinberg; McCormick, and Weinberg. Correlation of Speech and Voice Impairment in Parkinson's Disease; Daniel Corcos, adviser.

WalterGuo Maradiegue Montealto, Spanish and Portuguese Evolutions; Geographies of Indigeneity: Space, Race, and Power in the Andes, 1880–1930; Mary Weismantel, adviser.

Francisco Epimeño Maravilla, Psychology; Weinberg. Comparison and Alignment in Categorization; Dedre Gentner, adviser.

Riccardo Marchingillo, Economics; Weinberg. Essays in Economic History and Labor Economics; Joel Mokyr, adviser.

Casty Towler Markman, Interdisciplinary Theatre and Drama; Communication. Entrance Forbidden to the Yiddish Theatres: Performance, Prostitution, and Protest in Buenos Aires (1900–1930); Tracy Davis, adviser.

Mark Andrew Maskeri, Chemistry; Weinberg. New Cooperative Catalysis Strategies; Karl Sheidt, adviser.

Kaylene Joy Mellonan, Management and Organizations; Kellogg. Two Ways to the Top? When and Why Dominance and Prestige Lead to Social Rank; Nousi Keily, adviser.

Nicholas James McCreery, Mathematics; Weinberg. Singularities of Plurisubharmonic Functions and Kaehler Geometry; Valentino Tosatti, adviser.

Laura Claire McCoy, History; Weinberg. In Distress: The Maritime Society of the Early American Republic; Caitlin Fitz, adviser.

Gregory Scott McElroy, Driskill Graduate Fellowship Program in Life Sciences; Feinberg. Mitochondrial Complex I Function in Leigh Syndrome: Investigating the Early American Republic; Caillt Fitz, adviser.

Scott David Miller, Art History; Weinberg. Royal Nomadism and the Valois Castle; Christina Normore, adviser.

Joseph Jacob Muldoon, Interdisciplinary Biological Sciences; McCormick and Weinberg. Model-Driven Elucidation of Synthetic and Immune Signaling Mechanisms; Joshua Leonard, adviser.

Matthew David Nelson, Political Science; Weinberg. Educational Sanctions and Socialization, and Reimagining Civic Education; James Druckman, adviser.

Scott Peter Newman, Comparative Literary Studies; Weinberg. Sound Figures in Postcolonial African Literature, 1970s to Present; Evan Mwangi, adviser.

Ashley Anna Niler Croydon, Media, Technology, and Society; Communication. Developing Leadership Credibility in Multimodal Systems; Leslie DeChure, adviser.

Sebastian Hernando Olano Espinosa, Mathematics; Weinberg. Some Applications of Perverse Sheaves and Hodge Theory to Birational Geometry; Milhea Popa, adviser.

Marjia Ostojic, Civil and Environmental Engineering; McCormick. Trajectory Analytics for Traffic Signal System Management in Connected Vehicle Environments; Hani Mahmassani, adviser.

Ji Eun Park, Chemistry; Weinberg. Plasmonic Substrates: Toward Surface-Enhanced Raman Spectroscopy In Vivo Biosensing; Milan Mrkic, adviser.

Alejandra del Carmen Peña Ordieres, Industrial Engineering and Management Sciences; McCormick. Nonlinear Programming Approximations of Chance Constraints; Andreas Waechter, adviser.

Ibrahim Emirhan Poyraz, Computer Engineering; McCormick. User-Experience-Aware System Optimizations for Mobile Systems; Gokhan Memik, adviser.

Gerardo Emilio Pradillo Macias, Mechanical Engineering; McCormick. Quincke Rotors Dynamics in Confinement; Petia Vlahovska, adviser.

Irina Rabbkina, Computer Science; McCormick. Analogical Theory of Mind: Computational Model and Applications; Kenneth Forbus, adviser.

Rohit Ramanathan, Materials Science and Engineering; McCormick. Modeling Oxide Growth and Morphology Evolution during Alloy Oxidation and Corrosion; Peter Voorhees, adviser.

Louis Robert Redfern, Chemistry; Weinberg. Understanding the Role of Structural Characteristics in the Catalytic and Mechanical Properties of Metal-Organc Frameworks; Omar Farha, adviser.

Emily Jean Reedick, Interdepartmental Neuroscience; Communication, Feinberg; McCormick, and Weinberg. Neuromuscular System Degeneration in Mouse Models of Spinatal Muscular Atrophy; Christine DiDonato and C. J. Heckman, advisers.

Arius Alexander Kalleberg Ring, Finance; Kellogg. Essays in Household and Corporate Finance; Dimitris Papanikolaou, adviser.

Jonas Rosenberg, Comparative Literary Studies; Weinberg. Senses of Smell: The Differentiation of Air in Hölderlin, Nietzsche, and Ponge; Peter Fenves, adviser.

Jennifer Claire Rote, Chemistry; Weinberg. Studies in Natural Product Synthesis: Towards (1) Tambromycin and (2) the Solanum Strophanthos; Regan Thomson, adviser.

Nathan A. Len Sanford, Engineering Sciences and Applied Mathematics; McCormick. Rare Events in a Mode-Locked Fiber Laser; William Kath, adviser.

James Ciro Schwabacher, Chemistry; Weinberg. The Effects of Phase Transfers with Thiol Ligands on the Optical Properties of Water-Suble Quantum Dots; Emily Weiss, adviser.

Yangjin Shin, Materials Science and Engineering; McCormick. Deliberate Deficiencies: Expanding Function with Structural Vacancy Order; James Rondinelli, adviser.

Hang Shu, Civil and Environmental Engineering; McCormick. Analyzing and Improving Transportation Infrastructure Privatization in a Competitive Environment; Pablo Durango-Cohen, adviser.

Katherine Mae Siegwe, Communication Sciences and Disorders; Communication. The Impact of Prior Knowledge and Spectral Degradation on Spoken Lexical Access in Children; Tina Grieco-Calub, adviser.

Ki Hee Song, Biomedical Engineering; McCormick. Technical Advances in Spectroscopic Single-Molecule Localization Microscopy for Improving Spatial Resolution and Spectral Precision; Hao Zhang, adviser.
Lin Sun, Materials Science and Engineering; McCormick. Towards Building Optical Micro-Projectors with Programmable Assembly; Chad Mirkin, adviser.

Andrew Ifedapo Thompson, Political Science; Weinberg. Fear and Loathing in White America: The Effects of Group Threat on Political Attitudes and Perceptions; James Druckman, adviser.

Zihao Wang, Computer Science; McCormick. Self-Assembly of Colloidal Particles; Abhi Abdi, adviser.
