[The Alumnae of Northwestern University Continuing Education Spring Quarter 2024 Registration](#)

The Alumnae of Northwestern University's Spring Quarter Continuing Education courses, open to the public, are offered in person at Norris Center and live-streamed via Zoom. The CE program features non-credit courses taught by University faculty. All proceeds are given back to the University in the form of scholarships, fellowships, grants, an endowed professorship, and more.

Spring Quarter courses are: **Schisms in Society**, taught by faculty from multiple departments; **European Unification and the Question of Sovereignty**, taught by Professor Michael Loriaux, Political Science; **The History of Antisemitism**, taught by Professor David Shyovitz, History; Director, Crown Family Center for Jewish and Israel Studies; and **Pinocchio to Pokemon: The History of Children's Media**, taught by Professor Jacob Smith, Radio- Television-Film; Director, MA in Sound Arts and Industries.

Courses will be taught for nine weeks on Tuesdays and Thursdays, beginning March 26. Enrolled students can choose to come to class in person or watch the livestream while also having access to the recordings of each week's lectures for a period of six days following the lecture. Students can enroll online through Norris Box Office (nbo.universitytickets.com), and then register for the Zoom and recordings. Additional information about the courses is available on The Alumnae website (nualumnae.org).

Northwestern's Institute for Policy Research and the Medill School of Journalism, Media, Integrated Marketing Communications are pleased to welcome:

Alondra Nelson

Harold F. Linder Professor, Institute for Advanced Study, and Senior Fellow, Center for American Progress

Additional event sponsors are Northwestern's Department of Sociology and the Science in Human Culture Program.

More information about the event and how to register will be coming soon.

ABOUT ALONDRA NELSON

An award-winning scholar who served in the Biden administration, Alondra Nelson's expertise sits at the intersection of science, technology, policy, and society. Nelson's research offers a critical and innovative approach to the social sciences in fruitful dialogue with other disciplines. Her major research contributions are situated at the juncture of racial formation and social citizenship, on the one hand, and emerging scientific and technological phenomena, on the other.

Arts

The Arts Circle. Your destination for the arts at Northwestern. With world-class exhibitions and performances, the Arts Circle welcomes patrons, students, faculty, staff, alumni, and the larger community alike. It's easier than ever to take in many wonderful and diverse experiences, all on one campus.

[Art Exhibitions and Discussions](#)

[Well Versed: Dittmar Gallery 2024 Community Art Show](#)

Well Versed is an invitation to explore the intertwining of art and language through the unique medium of poetry. This art exhibit prompts visual artists in our community to create works inspired by poems that have touched their lives. Invoking reflection on a sweeping range of themes through a wide range of poetic works, each artist calls upon the visceral emotions and experiences that make us human.

The exhibit includes the art pieces created by members of our community coupled with the text of their poetic inspiration. Well Versed is a conversation that invites cross disciplinary fusion between the visual and literary arts to explore the heartbeat of the human experience.

[Casting Beyond the Binary](#)

When: Saturday, March 2, 2024, 12:00 PM - 1:30 PM CT
Where: Wirtz Center for the Performing Arts, Mussetter-Struble Theater, 1949 Campus Drive; 10-30 Arts Circle Drive, Evanston, IL
Contact: Brannon Bowers, (847) 467-1172, brannon@northwestern.edu
Gender is an ever-evolving part of our society; a continually reinforced structure often used to understand and evaluate each other. The same can be said of casting. As our industry aspires toward a more intersectional discourse on stage, how can we revisit and remake our casting processes to embrace this future? How can the theater be a site for social change both on

and off stage?

Join us for a discussion with some of the cast & team of AMTP's *Wonder Boy* as we define and explore the use of gender-expansive casting, genderless casting, gender swapping, nonbinary & transgender casting, and other non-traditional casting practices in theater. By openly and actively exploring these customs with local TGNC professionals in the field, we hope to help validate the diverse spectrum of gender identities & expressions in theatrical performances and the real world alike.

["Actions for the Earth" Gallery Talk with Stephanie Smith](#)

When: Saturday, March 2, 2024, 12:30 PM - 1:30 PM CT

Where: Block Museum of Art, Mary and Leigh, 40 Arts Circle Drive, Evanston, IL

Contact: Block Museum of Art, (847) 491-4000, block-museum@northwestern.edu

Join consulting curator Stephanie Smith for an overview of the exhibition and an activation of artist Katie West's participatory work Gently Give Attention, through the offering of tea to program participants. Tea will be shared within West's installation, Clearing.

Block gallery talks explore exhibitions by posing multidisciplinary questions and perspectives, led by knowledge sharers across Northwestern and beyond.

Actions for the Earth: Art, Care & Ecology is a traveling exhibition that considers kinship, healing, and restorative interventions as artistic practices and strategies to foster a deeper consciousness of our interconnectedness with the earth.

Space at this program is limited to 25 and advance registration required.

[International Women's Day Poster Exhibition: Portraits of Remarkable Women from Different Languages and Cultures](#)

When: Monday, March 4, 2024, 5:00 PM - 7:00 PM CT

Derrick Gardner, conductor

Journalists and record companies began using the term “hard bop” in the mid-1950s to describe a new current within jazz that incorporated influences from rhythm and blues, gospel, and the blues. Prominent hard bop musicians included Horace Silver, Charles Mingus, Art Blakey, Cannonball Adderley, Miles Davis, and Thelonious Monk. An influx of musical thought among hard bop musicians led to a push for the subgenre to evolve, with John Coltrane, Wayne Shorter, McCoy Tyner, and Herbie Hancock incorporating touches of avant-garde and free jazz. Their objective was to blur the division between the written and the spontaneous, celebrating imperfect boundaries and freedom of musical expression. Join the Jazz Orchestra for an exploration of hard bop's evolution.

Terrifying Angel—Choral Explorations of Rilke

Andrew Megill and Tim Lambert, conductors

Stephen Andrew Taylor, guest composer

An evening of choral settings of poetry by Rainer Maria Rilke, whose beautiful and powerful words explore the human experience of transcendence. Paul Hindemith's *Six chansons* elegantly set the poet's miniature French poems, which vividly depict fleeting moments of truth via their descriptions of the natural world. *Die erste Elegie* by the Finnish composer Einojuhani Rautavaara transforms one of Rilke's most complex poems (and one of the poet's own favorites) into a dramatic work for virtuoso choir. Also on the program is a commission from Illinois composer Stephen Andrew Taylor ('87) and the American premiere of Rilke settings by Canadian composer Ramona Luengen.

[Christopher Guzman, piano](#)

When: Friday, March 29, 2024, 7:30 PM - 9:30 PM CT
Where: Patrick G. and Shirley W. Ryan Center for the Musical Arts, Galvin Recital Hall, 70 Arts Circle, Evanston, IL
Cost: Tickets are \$8 for the general public and \$5 for students with valid ID.
Contact: Concert Management Office, (847) 467-4000, events.music@northwestern.edu
A winner of top prizes in the Walter M. Naumburg Competition, the Seoul International Music Competition, and the Isang Yun Competition, Christopher Guzman has performed throughout Europe, North and South America, and Asia. Following a win at the Concours International de Piano d'Orléans, he toured France extensively, giving performances and leading master classes. As a chamber musician, Guzman has collaborated with violinist Ilya Gringolts, violist Antoine Tamestit, and fellow pianists David Fray and Jeremy Denk. His orchestral appearances have included the Berliner Philharmoniker, the Philadelphia Orchestra, the San Francisco

Symphony, the Chicago Symphony Orchestra, the New York Philharmonic, and the Seoul Philharmonic Orchestra. His program, highlighting études and dances, showcases music of Schulhoff, Ravel, and Schubert, as well as Sam Shepherd, a visiting professor of composition at the University of Chicago and recipient of the 2024 Charles Ives Living Award.

others! They'll be on hand to repair, responsibly recycle, screen print vintage clothes, play bicycle-powered tunes, and discuss new strategies to reduce your environmental footprint and advocate for greater change.

Northwestern Music Academy

[Learn more online](#)

For more than 70 years, Northwestern University's Music Academy in Evanston has provided music instruction to children and adult students from surrounding communities and the greater Chicago and Northwest Indiana area.

Most Academy instructors also teach in the Henry and Leigh Bienen School of Music and hold masters and doctoral degrees in music teaching and performance. The Academy often serves as a teaching laboratory for college students enrolled in pedagogy courses and is a member of the National Guild of Community Schools of the Arts.

Kindermusik (newborn to age 6)

Dates: Term starts Jan 28 and ends May 13. Cost:

\$300-355 (15-week class and home materials)

This 45-minute class is a lovely way for young children and parents to interact. Multi-level activities that are appropriate for each stage of a child's development give lap babies, crawlers, and walkers a chance to explore music, touch, sound, and movement. Home materials including a CD, a book related to the theme of the unit, and an instrument provide additional ideas for sharing the class experience at home.

Other Courses

(offered virtually and in-person Winter Quarter)

[Piano and Organ](#)

The Music Academy Piano Division offers pre-piano class, which serves as an introduction to more formal piano instruction: keyboard instruction in two tracks for students ages 6 to 18, and instruction for adults. Pre-piano serves as an introduction to more formal piano instruction. Keyboard instruction for children begins with pre-staff music and expands to landmark-based intervallic reading. After the first year of study, most children participate in the Illinois State Music Teacher's Association curriculum assessment, where they demonstrate skills and receive certificates and pins for participation.

Strings

The String Division offers private lessons in violin, viola, and cello, with goals of both providing musical instruction and instilling a love of music and of learning music. The division believes that all children can learn to their potential when placed in an environment that includes clear instruction, an involved parent, and regular opportunities to listen to and perform.

Genre and Conversation

Conversations belong to different genres. For example: Some conversations are aimed at information exchange, while others are aimed at deciding what to do. In some we make firm commitments, in others we merely explore options. In some we stick to the facts, while in others we engage in make-believe. Finally, some conversations are cooperative while others are adversarial. I argue that these kinds of genre don't arise from social conventions, but are constituted by recurring patterns in the shared conversation plans that we build together in order to organize discourse. Different dimensions of genre variation arise from patterns at different levels within conversation plans, including our plans to resolve the "question under discussion," as well higher-level plans that may or may not be shared by the interlocutors. Finally, I argue that a capacity to navigate genre is not, strictly speaking, necessary for all communication, but can make communication much more efficient. In this sense, this capacity should be understood as part of our pragmatic competence.

Recent events have reminded us that the violence of war causes significant damage to affected populations, through both the direct violence of bombs and guns as well as the indirect violence of deprivation, neglect, and oppression. In this talk, Dr. Yara Asi will discuss the health outcomes of war in the war environment and for those displaced by war, using the Gaza Strip as a case study of the many ways political violence harms population health.

Dr. Yara Asi is an Assistant Professor at the University of Central Florida in the School of Global Health Management and Informatics. Her research agenda focuses on global health, human rights, and development in fragile populations. She is a Non-Resident Fellow at the Arab Center Washington DC, a 2020-2021 Fulbright US Scholar to the West Bank, and the Fall 2021 US Fellow at Al Shabaka Policy Network.

Lecture hosted by Department of Asian Languages and Cultures
Since its publication in 1791, Honglou meng (Dream of the Red Chamber) has been subjected to constant adaptations across genres and media. This lecture examines the afterlives of the Chinese classic in some of most experimental theatrical projects staged in the United States. How was the novel re-envisioned by the producers and viewed by the audience as it moved beyond the cultural boundaries of East Asia and Sinophone communities? How far can we dream and still help to better understand the musical, psychological, and identity-driven features of the literary canon?

The Northwestern Israel Innovation Project and the Chicago Festival of Israeli Cinema present "Israel Behind the Scenes" featuring award-winning Israeli filmmaker Barak Heymann LIVE. The October 7 attack has traumatized both Israelis and Palestinians. It also holds the potential for inevitable and much-needed change. During Barak's program, he will share the painful reality in which he lives and what he believes is needed for this turbulent war to give way to a better and more humane future. Through this talk, Barak interweaves select clips of films and television series, like Bridge Over the Wadi (2006), Almost Friends (2014), Comrade Dov (2019), and a new yet unfinished documentary, all of which touch on issues and layers that make the Israeli reality so complex – conflicted and racist, but at the same time full of potential, activism and hope.

Abstract
Black women's bodies have been instrumental in the development of medical and scientific breakthroughs, which have aided countless humans across the world. However, the degree to which these medical and scientific gains have actually helped the health and well-being of Black women remains unclear. This talk is an introduction to Professor Bailey's documentary that addresses the ways that misogynoir has influenced medicine at the expense of Black women's health.
Biography
Moya Bailey is an associate professor in the Department of Communication Studies at Northwestern University. Her work focuses on marginalized groups' use of digital media to promote social justice, and she is interested in how race, gender, and sexuality are represented in media and medicine. She is the digital alchemist for the Octavia E. Butler Legacy Network and the Board President of Allied Media Projects, a Detroit-based movement media organization that supports an ever-growing network of activists and organizers. She is a co-author of #HashtagActivism: Networks of Race and Gender Justice (MIT Press, 2020) and is the author of Misogynoir Transformed: Black Women's Digital Resistance (New York University Press, 2021). She was an MLK Visiting Scholar at MIT for the 2020–2021 academic year.

Sean Munson, PhD, University of Michigan
Many people prefer psychosocial interventions for mental health care or other concerns. These interventions are often complex and unavailable in settings where people seek care, in part due to their complexity. Intervention designers, as well as researchers in human computer interaction, have used technology to scale and improve the reach of interventions, add new touchpoints to existing interventions, enhance interventions' usability, and imagine new interventions. Doing so requires approaches that bring together strengths of clinical, implementation science, human centered design, and human computer interaction research.

Public Health Seminar Series

Featuring:

Nathan Walter, PhD

Associate Professor of Communication Studies

Northwestern University

Founder and Co-Director of the Center of Media Psychology and Social Influence (COM-PSI).

In the contemporary media environment individuals often encounter myths, falsehoods, rumors, reporting errors, and conspiracy theories deliberately or inadvertently circulated by the media, governments, and other interest groups. These types of dis/misinformation pose a substantial challenge, and, in some cases, can result in physical harm, or even death. To this end, massive efforts are devoted to debunk misinformation; yet, scientific evidence of the effectiveness of these measures appear to be inconsistent.

While some studies have found that corrective information can successfully debunk falsehoods, other studies suggest that individuals may struggle to discount misinformation, and, in some cases, correction attempts can even backfire by increasing support for the discredited position. Dr. Walter will present findings from his ongoing work on the continued influence of misinformation and the ability of nonpartisan fact-checkers to challenge the veracity of false information. The talk will also explore various psychological mechanisms that underlie these effects and provide specific recommendations for more effective correction efforts.

[Family Action Network \(FAN\) - Holy Shift!: Moving Your Company Forward to the Future of Work](#)

Dan Michelson's new book, Holy Shift!: Moving Your Company Forward to the Future of Work, takes you on a fascinating journey to the heart of the single biggest and fastest shift in how we work and live in history. Readers and leaders at every level of an organization will discover practical ideas and actions that address three big, thorny questions: How did we get here, where do we go from here, and how do we get there?

Michelson will be in conversation with Sarah Alter, a national thought leader and role model in the workplace, serving for six years as the CEO of NextUp, the largest network of executive women in the country. Alter's previous experience includes executive roles at Staples, Discover, and General Growth Properties. She has been appointed to serve three terms on the Illinois State Lottery Advisory Board.

[6th annual Women in Medicine Conference](#)

When: Friday, March 8, 2024, 8:00 AM - 4:30 PM CT

Contact: Nivia Boykin, (312) 926-4653, domweb@northwestern.edu

Join Northwestern University Feinberg School of Medicine for the 6th annual Women in Medicine Conference. This year's theme is "Forum for Opportunities - Empowering Success", to be held on March 08, 2024 in Feinberg A. This will be an in-person event with a live stream, but we hope to see you in person!

This year, we will discuss topics relevant to all clinicians, researchers and healthcare workers. We will review data from the literature, identify barriers and facilitators, and discuss tools to support and promote the development of leaders who identify as women and sexual/gender minorities. We will highlight the role of allies in creating a diverse, inclusive, and equitable work environment.

Northwestern University's Querrey InQbation Lab is hosting the FoundHer Stories series to amplify the startup stories of women scientist entrepreneurs.

Learn about Dr. Lexi Rovner's experience spinning out 64x Bio in 2017 from her postdoctoral research at Harvard while working with Prof. George Church. Dr. Rovner will share how her company is transforming the future of cell and gene therapy with high-throughput engineering of cell lines to enhance the design and manufacture of next-generation therapeutics.

While the FoundHer Stories series is focused on supporting women innovators and entrepreneurs, all are welcome to register.

Please register in advance.

OUR SPEAKER

Lexi Rovner, Ph.D., is the co-founder and CEO of 64x Bio, a spinout of Harvard Medical School and the Wyss Institute. Using novel high throughput genome engineering and screening technologies in a design loop with computational tools, 64x Bio is developing highly optimized cell lines for the manufacturing of viral vectors. These fundamental advances enable pharmaceutical and biotechnology companies to bring more lifesaving cell and gene therapies to patients by reducing the cost and complexity of manufacturing, a critical bottleneck in this growing market. Lexi completed her PhD at Yale University and her postdoc in George Church's lab at Harvard Medical School, where she co-founded the company alongside George, Pam Silver, Jeff Way, and David Thompson. Lexi is a Y Combinator alum and a 2022 Endpoints 20 under 40 Next-Generation Biotech Leader.

[EES Seminar: Water Foraging Strategies By Vegetation Across Ecosystems- Max Berkelhammer](#)

When: Friday, March 8, 2024, 2:00 PM - 3:00 PM CT
Where: Technological Institute, 230, 2145 Sheridan Road, Evanston, IL
Contact: Andrew Liguori, (847) 491-3257,
andrew.liguori@northwestern.edu

Access to soil water is the most common limiting factor for vegetation growth and productivity across the planet. Plants have thus developed multiple competitive strategies to acquire water through dynamic root profiles, changing the conductivity of root and stem material and uptake of dew and fog waters across the leaf interface. I will discuss our field observations and modeling approaches to study the dynamics of plant water use across major biomes and how these water foraging strategies influence vulnerability and resilience of ecosystems to stressors such as drought and warming.

Max Berkelhammer's research focuses on the interactions between the land surface and the atmosphere with an emphasis on how climate change impacts the global carbon and water budgets. Max is currently a lead PI for one of the Department of Energy's Urban Integrated Field Lab programs called "Community Research on Climate and Urban Science (CROCUS)" The aim is to create new insights on urban climate challenges that will inform future actions for mitigating and adapting to climate change at the street, neighborhood, and regional levels.

In *Over the Influence: Why Social Media is Toxic for Women and Girls – And How We Can Take It Back*, communication professor and CNN Opinion contributor Kara Alaimo, reveals how social media is affecting every aspect of the lives of women, girls, and nonbinary people—from our relationships and our parenting to our physical and mental wellbeing. *Over the Influence* is a book about what it means to live in the world social media has wrought – whether you're constantly connected or have deleted your accounts forever. Alaimo shows why you're likely to get fewer followers if you're a woman. She demonstrates how fake news is crafted to prey on women's vulnerabilities. She reveals why so much of the content we find in our feeds is specifically designed to hold us back. And she explains how social media has made the offline world an uglier place for women.

Alaimo will be in conversation with Laura Apperson, an editor who specializes in innovative nonfiction who is spearheading the new nonfiction program at Alcove Press. Previously, Apperson was an editor at St. Martin's Press and Rockridge Press.

[IPHAM Seminar Series—The Role of Intuition in Epidemiology](#)

When: Thursday, March 28, 2024, 12:00 PM - 1:00 PM CT
Where: Robert H Lurie Medical Research Center, Baldwin auditorium, 303 E. Superior, Chicago, IL
Contact: IPHAM, ipham@northwestern.edu

Intuition is a necessary part of everyday life, without which we could not make it through a day. Epidemiologists are taught to rely on science, reason, and facts in their work and yet, it is likely that we use intuition all the time. We use it when we make decisions about interpreting the results of studies, about the impact of sources of bias, in the decisions we make in our own research, in our teaching and in our communication with other scientists and the general public. Yet it isn't clear when this approach is useful and when it causes harm. This talk will focus on the role of intuition in epidemiology with examples of cases where we rely on it too much and cases where we don't use it enough.

Northwestern Pritzker Law, the Program on Food and Animal Law and Sustainability and the Donald Pritzker Entrepreneurship Law Center present a Symposium on "Animal Welfare and Climate Change: Intersections and Parallels." We are grateful to our sponsor, The Brooks Institute.

In this symposium, we will delve deep into the critical issues that arise at the crossroads of animal welfare and climate change. We aim to provide a comprehensive platform for engaging discussions and knowledge sharing, and we are proud to present an agenda that promises a day filled with meaningful insights. This program is pending approval for general CLE credit hours in the state of Illinois. This event will bring together leading experts and thought leaders from diverse backgrounds to explore the pressing challenges and potential opportunities within this complex intersection. Our symposium is divided into five panels, each dedicated to a specific aspect of the topic.

[Northwestern Prison Education Program: Trauma 102 Workshop](#)

When: Friday, March 29, 2024, 10:00 AM - 12:00 PM CT

Where: 1800 Sherman Avenue, Suite 3-000, Room 3029, Evanston, IL
Contact: NPEP group, NPEP@northwestern.edu

Given the nature of our work, many of our students will have experienced some form of trauma in their lifetime, including from the deprivation, violence, and cruelty of incarceration itself. Moreover, working closely with people who are suffering, especially when there is a relationship of care, can make one vulnerable to vicarious or secondary trauma.

One of our colleagues at Northwestern's Feinberg School of Medicine who has expertise in trauma—Faith Summersett Williams—very generously ran a Trauma 101 workshop for us back in June and will now be running a Trauma 102 workshop for us on March 29. We strongly encourage you to attend in person.

If you are unable to attend in person, we will have a Zoom option and will also record the workshop.
