

Budget and Planning Committee Report

The Senate charged the Budget and Planning Committee this year to develop a process for working with the University's planning administration on an ongoing basis. To find out more about the administration's activities and how we might participate, a number of meetings have been held with EVP Nim Chinniah and the Provost. Based on this exchange of views, we were asked to prepare ideas for the administration's consideration. A meeting to discuss these ideas is now set for June 23. Assuming a mutual understanding is reached, the Committee will work next year to develop specific actions steps and seek approval from the Senate for implementation.
