

Northwestern
OFFICE OF FELLOWSHIPS

Fellowship Winners 2023–24

Welcome to Northwestern University's Office of Fellowships!

You may wonder what a fellowship is. A fellowship can be

- a **grant** for a creative or research project
- a **scholarship** for an academic qualification
- an **internship** for professional development

What makes a grant, scholarship, or internship a **fellowship** is the cohort of people chosen to develop their talents, together with guidance from mentors, through group activities, and in support of a larger goal.

This booklet lists the hundreds of Northwestern students and alumni who secured external funding during the 2023–24 academic year to create, research, study, and intern through fellowships across the country and around the globe.

Fellowships are listed in four categories:

- those requiring students to apply first to Northwestern for endorsement before filing an application to a national competition
- those offering international experiences
- those funding recipients at domestic off-campus destinations
- those funding student activities on campus
- those funded by Northwestern alumni donors

We want you to join these fellowship winners and help us paint the world purple, one Wildcat at a time!

Elizabeth Lewis Pardoe, PhD
Director

*Year in parentheses after school name indicates date degree was received.
Abbreviated year after winner's name indicates current undergraduate class year.*

Meet some of our undergraduate winners

Madeleine Bagnall, a senior in the the Weinberg College of Arts and Sciences with majors in psychology and environmental sciences, won the *National Science Foundation Research Experiences for Undergraduates* award, which funded her work last summer at Southern Methodist University in Dallas.

Senior **Simon Hedin**, a chemical engineering major in the McCormick School of Engineering and Applied Science, spent last summer at the National Renewable Energy Laboratory in Golden, Colorado. His research on molybdenum disulfide as a scalable and cost-effective HER electrocatalyst was funded by the *Department of Energy Science Undergraduate Laboratory Internships*.

After being selected for the *Deutscher Akademischer Austauschdienst Research Internship in Science and Engineering*, third-year student **Sophia Jukovic** spent last summer in Bonn, Germany. A neuroscience and data science double major in Weinberg College, Jukovic conducted research on nutrition and microbiota.

Erin Mannschreck, a 2024 graduate of Weinberg College in gender and sexuality studies, is spending the year in Kaohsiung City, Taiwan, as an English teaching assistant through the *Fulbright US Student Program*. Mannschreck is one of four Wildcat Fulbright recipients teaching English in Taiwan this year.

Elizabeth Marino, a senior neuroscience major in Weinberg College, spent last summer in Klosterneuburg, Austria, conducting research at the Institute of Science and Technology through the *ISTernship Summer Fellowship*. Marino's research analyzed electrical signal data collected from rat brains as they navigated mazes and learned a reward paradigm.

Junior **Brandon Takahashi**, a Weinberg College double major in environmental sciences and environmental policy and culture, was honored last year by the *Japanese American Citizens League Chicago Scholarship Program* for promoting the Japanese American community's legacy and cultural heritage. He was also chosen for the *Sustainability Undergraduate Research in Geoscience and Engineering Program*, hosted at Stanford University.

Sophomore Weinberg College student **Ella Williams** spent the summer on the Texas A&M University-Kingsville campus conducting research through the *US Department of Agriculture/National Institute of Food and Agriculture Research and Extension Experiences for Undergraduates* program. An environmental sciences major, Williams was excited to study wind and solar energy feasibility for farms and ranches.

Donor-Funded Fellowships

Findlay Fellowship

The Findlay Fellowship provides financial support to a recent Northwestern undergraduate pursuing graduate study in the United Kingdom. The fellowship was endowed through a generous gift from Northwestern trustee D. Cameron Findlay and his wife, Amy Scalera Findlay.

Hannah Christensen

Neuroscience and Music, Weinberg (2024)
Study—United Kingdom

Roger Boye Oxbridge Bursary

The Roger Boye Oxbridge Bursary honors Medill associate professor emeritus in service Roger Boye, who, as chair of the British Scholarship Committee, offered unstinting support to Wildcats embarking on graduate study at the Universities of Oxford or Cambridge.

Hannah Cole

Journalism and Legal Studies, Medill (2024)
Study—United Kingdom

Clark and Hinman Foundation Fellowship

The Clark and Hinman Foundation Fellowship supports summer activities for applicants who display academic excellence and dedication to strengthening the principles of civil society.

Love-Kendy Jourdan '27

Political Science, Weinberg
Internship—Haiti

Anya Mateu-Asbury '26

Social Policy, Education and Social Policy
Internship—New York City, New York

Meet some of our graduate student winners

Justin Chen, a biomedical engineering doctoral student, is one of several Wildcats who last year won the *American Heart Association Predoctoral Fellowship*, which funds cardiovascular and stroke research and provides mentorship. Chen conducts his research as a member of the Functional Optical Imaging Lab.

With support from the *Deutscher Akademischer Austauschdienst Research Grants*, **Lauren Cole**, a doctoral student in history, will spend this year conducting research in Germany for her dissertation, which considers two key texts by the nun Hildegard of Bingen and their influence on the history of medicine.

As a PhD candidate in linguistics, **Chantal De Leon** received support for her work from the *National Science Foundation Doctoral Dissertation Improvement Grants*. The award will help advance her research on how multiple sources of social information about a speaker influence speech comprehension and linguistic expectations.

Isaiah Gilley, a PhD student in chemistry, conducts research at the Kanatzidis and Sargent labs, where he seeks to design and implement new perovskite materials for photovoltaics applications to improve device performance. Last year he won funding for his research from the *National Science Foundation Graduate Research Fellowship Program*.

History PhD candidate **Hope McCaffrey** won the *George and Ann Richards Civil War Era Center Predoctoral Fellowship Program* and the *American Association of University Women American Dissertation Fellowship*, which will support her dissertation on why white women from free states aligned with Democrats, the more white supremacist and patriarchal of the two parties of the era.

With support from the *Wenner-Gren Dissertation Fieldwork Grant*, **Amrina Rosyada**, a PhD student in anthropology, will conduct research in Indonesia, where she studies the relationship between capitalist ruins and racialization and how ruins inform us about the nation's aspirations, memories, and future.

After winning the *GEM Employer Fellows* award two years ago, **Essien Taylor**, a PhD student in computer engineering, won the *National Science Foundation Graduate Research Fellowship Program* award last year. In the Power and Reliability Aware Architecture Lab, Taylor studies how we can reduce energy consumption in power-constrained embedded systems.
