Northwestern University

One Hundred and Sixty-Fifth
Annual Commencement

9 A.M., MONDAY, JUNE 12, 2023
Soon after Northwestern University was founded, its Board of Trustees adopted an official corporate seal. This seal, approved on June 26, 1856, consisted of an open book surrounded by rays of light and circled by the words Northwestern University, Evanston, Illinois.

Thirty years later Daniel Bonbright, professor of Latin and a member of Northwestern’s original faculty, redesigned the seal, retaining the book and light rays and adding two quotations. On the pages of the open book he placed a Greek quotation from the Gospel of John, chapter 1, verse 14, translating to The Word . . . full of grace and truth. Circling the book are the first three words, in Latin, of the University motto: Quaecumque sunt vera (Whatsoever things are true). The outer border of the seal carries the name of the University and the date of its founding. This seal, which remains Northwestern’s official signature, was approved by the Board of Trustees on December 5, 1890.

The full text of the University motto, adopted on June 17, 1890, is from the Epistle of Paul the Apostle to the Philippians, chapter 4, verse 8 (King James Version).
TO OUR GUESTS
While the University respects the rights of all to express their views, we request that any such expressions during these Commencement proceedings neither disrupt the ceremony nor prevent others from enjoying it.

MICHAEL H. SCHILL
President

Michael H. Schill took office as Northwestern’s 17th president on September 12, 2022. He also serves as a professor in the Northwestern Pritzker School of Law.

He previously spent seven years as president of the University of Oregon, where he raised the university’s profile in teaching, research, innovation, student access, and diversity. Under Schill’s leadership, UO built the Phil and Penny Knight Campus for Accelerating Scientific Impact, increased its four-year graduation rates by 10 percentage points, and launched the Ballmer Institute for Children’s Behavioral Health at a new campus in northeast Portland. Schill also led the extension and historic close of the university’s fundraising campaign in 2021, which exceeded its goal with $3.2 billion total raised.

Schill is a nationally recognized expert in property, real estate, and housing law and policy. He is the author or coauthor of 3 books and more than 40 scholarly articles. His work includes studies of the determinants of value in condominium and cooperative housing, the impacts of housing programs on property values, the enforcement of Fair Housing laws, mortgage securitization, and the effects of housing market regulation. Property, which he coauthored with James Krier and Greg Alexander, is one of the most widely adopted casebooks in American law schools.

He served as dean and professor at the law schools of the University of Chicago and UCLA, and he has held tenured faculty positions at New York University and the University of Pennsylvania. In 2004 Schill founded NYU’s Furman Center for Real Estate and Urban Policy, which has become one of the nation’s leading research centers on housing and the built environment.

He has served on several nonprofit boards and civic bodies, including Argonne National Laboratory, ITHAKA, the Chicago Innovation Exchange, and the Housing Preservation Compact of Chicago.

Before beginning his career as a professor, Schill served as law clerk to the Honorable Marvin Katz of the Eastern District of Pennsylvania and was a real estate attorney at the New York City law firm of Fried, Frank, Harris, Shriver and Jacobson.

PETER J. BARRIS
Chair, Board of Trustees

Peter J. Barris joined New Enterprise Associates (NEA) in 1992 and was the firm’s managing general partner from 1999 to 2017. Having retired in 2019, Barris now serves as chairman. During his 18 years at the helm, NEA’s assets under management grew from $1 billion to more than $20 billion and the organization scaled its operations to become one of the world’s largest venture capital firms. Under Barris’s leadership, NEA invested in industry-transforming technology companies like CareerBuilder, Tableau, Groupon, Jet.com, Juniper Networks, Salesforce.com, TiVo, WebMD, and Workday. He has been named to the Washington Tech Council’s Hall of Fame, to the Washington Business Hall of Fame, and several times to the Forbes Midas List of top technology investors. Barris has personally led investments in over three dozen technology companies that have successfully completed public offerings or mergers. He currently serves on the board of directors for public companies Berkshire Grey, Sprout Social, and ZeroFox. Barris also serves on the boards of the Brookings Institution, In-Q-Tel, and several private companies.

Although he is a longtime resident of Virginia, Barris has been a very active participant in the Chicago tech scene. He serves on the board of P33 and has been named to Crain’s Chicago Tech 50 list. In 2015 the Illinois Venture Capital Association honored him with the Golder Award for his “profound and lasting contributions to the private equity industry in Illinois.”

Prior to joining NEA, Barris was president of Legent Corporation and senior vice president of the Systems Software Division of Uccel Corporation. Both companies were ultimately acquired at valuations that were record-breaking for their time. Earlier, he spent almost a decade at General Electric Company in a variety of management positions, including vice president and general manager at GE Information Services. In addition to chairing the Northwestern University Board of Trustees, Barris has served on the executive committee of the board of the National Venture Capital Association and the Tuck School board of overseers and was a founding member of Venture Philanthropy Partners, a philanthropic organization in the Washington, DC, area.

Barris received his BSEE from Northwestern University and his MBA from the Tuck School of Business at Dartmouth.

LAND ACKNOWLEDGMENT
To recognize the land is an expression of gratitude and appreciation to those whose territory we reside on—and a way of honoring the Indigenous people who have been living and working on the land from time immemorial. It is important to understand the long-standing history that has brought us to reside on the land and to seek to understand our place within that history.*

The Northwestern campus sits on the traditional homelands of the people of the Council of Three Fires—the Ojibwe, Potawatomi, and Odawa—as well as the Menominee, Ho-Chunk, and Miami tribes. It was also a site of trade, travel, gathering, and healing for more than a dozen other Native tribes; the state of Illinois is still home to over 100,000 tribal members.

Consistent with the University’s commitment to diversity and inclusion, Northwestern works toward building relationships with Native American communities through academic pursuits, partnerships, historical recognitions, community service, and enrollment efforts.

HISTORY OF NORTHWESTERN
The founding of Northwestern University by nine Methodists embodied a mixture of religious conviction and secular optimism that is uniquely American. Meeting above a hardware store in the burgeoning frontier town of Chicago, these nine resolved on May 31, 1850, to establish an institution of “the highest order of excellence.” The 1851 Act of Incorporation creating Northwestern University contained a provision reflecting the strong religious beliefs of its founders but requiring no particular religious faith of students or members of the faculty.

In 1853 the University bought and began to develop 379 acres of lakeshore farmland. The town that grew up around Northwestern was named for John Evans, one of the University’s founders. By 1855 Northwestern had completed its first building and opened a College of Liberal Arts. By 1900 the University encompassed six additional schools, including the medical and law schools in Chicago. Since the establishment of the Graduate School in 1910, Northwestern has provided graduate as well as undergraduate instruction, emphasizing research along with teaching.

The University’s development since then has paralleled the growth of metropolitan Chicago. Today Northwestern is a private research university of distinction, with 11 academic divisions located on two lakefront campuses in Evanston and Chicago as well as Northwestern University in Qatar, which opened in Doha in 2008. Northwestern’s vision of excellence—although faithful to its founding—involves a territory far beyond the old Northwest Territory through the accomplishments of its alumni and by virtue of a distinguished faculty and high-achieving student body drawn from across the nation and around the world.

Modern academic attire originated in the medieval universities of Europe, where gowns were worn daily to provide warmth in poorly heated buildings and to differentiate scholars from fellow citizens. Two English universities, Oxford and Cambridge, are particularly noted for developing the authentic academic costume, which has changed only slightly through the centuries.

In the United States most academic dress follows the general provisions of the Intercollegiate Code of 1895, which was revised in 1932 and again in 1959. Under this code the gowns’ trim and sleeve design indicates the level of the degree. The bachelor’s gown has pointed sleeves and is worn closed; the master’s gown has oblong sleeves with an arc at the bottom and may be worn open or closed; and the doctor’s gown, which may also be worn open or closed, has velvet facings down the front and three velvet bars on the bell-shaped sleeves. This velvet trim may be black or the prescribed color of the academic area. Though the recommended color for gowns is black, Northwestern University (like many institutions) has adopted a colored gown to reflect the school’s color. All participating candidates wear a custom purple gown featuring the University crest.

The style of hood identifies the level of the degree, the school that granted it, and the academic area. Hood length and border width show the level of the degree. The bachelor’s hood, which is optional and not worn at Northwestern University, is three feet in length; the master’s, three and one-half feet; the doctor’s, four feet. The velvet border of the hood is two, three, and five inches wide for the bachelor’s, master’s, and doctor’s degrees, respectively. The hood is lined with silk in the official color of the school. At Northwestern the hood is lined in purple (the school’s color) and gold. The color of the hood’s border—and at Northwestern the color of the cap’s tassel as well—indicates the academic area. Tassels feature the Northwestern seal signet and are worn on the left side at all times. At Northwestern the colors for the Graduate School constitute an exception; tassels are black, but the border color of the hood indicates the specific degree awarded. Bachelor’s degree regalia include a souvenir stole.

The square black mortarboard is the recommended cap, although some schools have adopted other styles. Caps are worn throughout the Commencement ceremony, except that men remove them for the national anthem.

At Northwestern University members of honor societies may be recognized by the honor cords, medallions, and stoles worn.

The tassels and borders of the hoods are the following colors:

GOVERNOR JB PRITZKER

**Doctor of Laws**

JB Pritzker has served as governor of Illinois since 2019 and began his second term on January 9, 2023. As governor he won bipartisan passage of Rebuild Illinois, the largest investment in state history to upgrade roads, bridges, rail, broadband, and schools. He has proposed and passed a balanced budget every year in office—eliminating the state’s multi-billion-dollar balance-due backlog, reducing the state’s pension liability, and achieving eight credit upgrades from rating agencies. His administration has created jobs, overseen efforts to raise the minimum wage, worked to make higher education more affordable, and advanced equal pay for women. Most recently, Governor Pritzker signed an assault-weapons ban into law, moved to protect and expand access to reproductive healthcare for both patients and providers, and supported a plan to provide paid leave for every worker in the state. A 1993 Law School graduate, Pritzker is a life member of the Northwestern Law Board. In 2015 he and his wife, MK, made a historic gift to the school, which was renamed the Pritzker School of Law.

*Presented by Adam Hoeflich, Professor of Practice, Pritzker School of Law*

You have led the state of Illinois with integrity and conviction, making advances in public safety, economic equity, job creation, clean energy, and fiscal responsibility. Your first term’s legislative agenda ranks among the most ambitious and consequential in state history, and your decisive reelection cemented your position as a national leader. Your generosity to your law school alma mater has been transformative. We are proud to call you one of our own.
MORTON SCHAPIRO
Doctor of Humane Letters

Morton Schapiro, professor of economics and president emeritus, served as Northwestern’s 16th president from 2009 to 2022. During his tenure, Northwestern rose dramatically in stature. The student body increased in quality and diversity as undergraduate applications nearly doubled; faculty memberships in national academies increased by more than 70 percent; annual sponsored research nearly doubled to just under $1 billion; the University endowment more than doubled; crucial academic facilities were built; and the University strengthened its partnerships with local communities. Prior to arriving at Northwestern, Schapiro served as president of Williams College from 2000 to 2009, having previously served as a dean and vice president at the University of Southern California. He is among the nation’s leading authorities on the economics of higher education and is the author or coauthor of 10 books and hundreds of journal articles, commentaries, and op-eds. In 2010 Schapiro was elected a fellow of the American Academy of Arts and Sciences, and in 2017 he was elected to the National Academy of Education.

Presented by Peter J. Barris, Chair, Northwestern University Board of Trustees

You led Northwestern for 13 years with distinction and devotion, greatly enhancing its worldwide reputation as you steered the University to new heights in innovation, research, diversity, and community. Concurrent with your tenure as president, you have continued to expand your work as a leading expert on the economics of higher education. Your passion for Wildcat athletics is legendary. We are deeply grateful for your distinguished service to Northwestern.

LUIS VALDEZ
Doctor of Arts

Luis Valdez is regarded as one of today’s most important and influential American playwrights. He founded the internationally renowned and Obie Award–winning theater company El Teatro Campesino (The Farm Workers’ Theater) in 1965 amid his involvement with Cesar Chavez, the United Farm Workers, and the early Chicano Movement. That experience left an indelible mark that has continued to be embodied in all his work, from his short plays Las Dos Caras del Patroncito and Quinta Temporada to his examinations of Chicano urban life in I Don’t Have to Show You No Stinkin’ Badges. In 1979 his Zoot Suit, considered a masterpiece of the American theater, became the first Chicano play to run on Broadway. His numerous feature film and television credits include La Bamba and Cisco Kid. Valdez’s many honors and awards include LA Drama Critics Circle Awards, the George Peabody Award for excellence in television, the National Medal of the Arts from President Obama, the Presidential Medal of the Arts from President Reagan, and Mexico’s prestigious Aguila Azteca Award.

Presented by Henry Godinez, Carlos Montezuma Professor and Chair, Theatre, School of Communication

You are widely considered the godfather of Latino theater in the United States. As a key cultural figure in recognizing the power of art as activism, you have given us unforgettable stories while exploring universal themes of human rights and social justice. Your work has broken barriers from rural California to Broadway and Hollywood, inspiring farm workers and theater audiences alike. We are honored and delighted to celebrate your enduring achievements.

Chair of the school’s social science department since 2016, she teaches Advanced Placement, honors, and at-level social science and history courses and has sponsored the UNICEF, Chess, Ping-Pong, and South Asian Clubs. In addition, she is a teacher facilitator for the Solanki Teacher Scholar Program in the Yudanandad Center for India Studies at California State University, Long Beach, and a guiding teacher at CSULB and the University of Southern California. For more than a decade she has served as an Advanced Placement reader and exam leader for the College Board. Ahlawat began her teaching career in Delhi, India, and then taught for four years at Alain LeRoy Locke High School in Los Angeles. “When I first learned about this award, Ms. Ahlawat was the first person who came to mind,” says student nominator Almaya Wiley-Yanc of the Weinberg College of Arts and Sciences. “Her classroom was a safe space for me and the first place where history piqued my interest. Today that is the major I will be graduating in.” Ahlawat earned BAs in geography and education from the University of Delhi and an MA in geography from Jawaharlal Nehru University.

Colette Beausoliel has taught life and physical sciences since 1993 at John F. Kennedy High School in Tamuning, Guam, where she chairs the science department and also serves as profile committee data analyst. She has chaired the school’s accreditation resources committee and has coached engineering and design teams, including Real World Design Challenge teams that won the US national championship for three consecutive years and the international championship twice. Previously she taught for four years at Guam’s Inarajan High School. Recipient of the University of Guam’s 2000–01 AECI outstanding teacher award, she was also voted Kennedy High School’s 2012–13 teacher of the year. Student nominator Yvan Chu of the McCormick School of Engineering and Applied Science praises Beausoliel as “a pioneer of STEM education in Guam who brought world-class engineering education and extracurricular activities to an underfunded school district. She is the most impactful teacher I have ever had.” Beausoliel received a BS in biology and postbaccalaureate secondary science teaching certification from the University of Arizona and an MS in environmental science from the University of Guam. She has also earned Guam secondary science and master educator secondary science certifications as well as five specialty certifications from the Professional Association of Diving Instructors.

Joseph Graciosa has taught since 2017 at Chicagò’s Eric Solario Academy High School, where he created and chaired the school’s inaugural computer science department. He also helped start the robotics team and served as its adviser, in addition to advising the school’s DREAM team for undocumented students and allies. He began his professional life as a research assistant at the Rehabilitation Institute of Chicago’s Center for Pain Studies but left after seven years to pursue a teaching career, subsequently holding a yearlong Chicago teacher residency with the Academy for Urban School Leadership and then teaching for two years at Chicago Tech Academy High School. Student nominator Lorenzo Rivera of the Weinberg College of Arts and Sciences says that Graciosa “embodies what a giving human being is. As a Wildcat himself, he exemplifies Northwestern’s striving for excellence and inclusion without expecting anything in return.” Graciosa studied computer science at Northeastern Illinois University, earned an MA in secondary education teaching at National Louis University, and holds a BA in chemistry from Northwestern, where he founded and led the Kaibigan Filipino Students’ Association.

Jason Stanford has taught social studies since 2012 at Niles West High School in Skokie, Illinois, where he has also taught reading for below-grade-level students, served on the literature team, and led the development of the AVID program to prepare minority, low-income, and first-generation students for college. In addition, he founded the school’s mock trial team and sponsored it for 10 years, leading the squad to five years of consistent top-10 finishes in local, national, and international high school competitions. Beyond Niles West, Stanford organized and led the annual Mock Trial Invitational at the Skokie Courthouse, an event that grew from 20 participants to over 300 in its first seven years. Student nominator Irena Petryk of the Weinberg College of Arts and Sciences says that Stanford “helped me become a more effective leader and taught me the value of generosity. As I leave Northwestern for new experiences, it is his kindness, selflessness, and dedication that I hope to embody.” Stanford received a BS in political science from Illinois State University, a BA in history and secondary education from Northeastern Illinois University, an MA in political and justice studies from Governors State University, and an endorsement in teaching reading from Olivet Nazarene University.

Michael Van Krey has taught Japanese since 1997 at Evanston Township High School in Evanston, where for 10 years he was also professional development cochair. He has sponsored multiple after-school clubs, including a Japanese Calligraphy and a Tea Ceremony Club. As the school’s Japan exchange coordinator, he has led 12 two-week student tours of Japan, hosted annual visits by students from ETHS’s Japanese sister school, and overseen all necessary fundraising. Previously Van Krey was an assistant language teacher through the Japan Exchange and Teaching Programme at Japan’s Kanonji Daichi High School. Recipient of a Fulbright-Hays scholarship, an Aurora Foundation scholarship, and US-Japan Foundation grants, he has given presentations at multiple conferences and was a member of a winning teacher team for the Goldman Sachs Foundation for Excellence in International Education’s High School Prize. Student nominator Liam O’Carroll of the McCormick School of Engineering and Applied Science says, “When I think of Mr. Van Krey, I think of excellence—excellence in teaching, creating community, and giving once-in-a-lifetime opportunities to so many students.” Van Krey earned a BA in biology and BM in bassoon performance from Lawrence University and a master’s in arts education and certificate of advanced study in educational leadership at National Louis University.
Dear graduates of the Northwestern University Class of 2023,

We share more than a love of the ’Cats.

A half century apart, your class and mine have the shared experience of living in tumultuous times that have tested our democracy and defined our values. There was surely no better place to experience these days, to explore their context, and to weigh their repercussions than in the classrooms and residence halls and libraries (and nearby beer joints) at Northwestern University.

Consider our parallels: The Class of 1973 arrived on campus for our first year in the wake of the chaotic 1968 Democratic National Convention in Chicago and as the trial of the Chicago Seven was about to begin. During the four years that followed, we saw escalating protests against the Vietnam War, on our campus and others, and a widening breach between generations. When we graduated, the Senate Watergate Committee had just finished hearings that would help lead to a presidential impeachment investigation.

The Class of 2023 arrived on campus as the nation’s fierce political polarization was becoming sharper than it had been since the Civil War. You lived through, and studied through, the worst pandemic in a century. By your graduation, you had seen two presidential impeachments and unprecedented efforts to overturn a US presidential election.

In our day, we sometimes wondered whether the republic could survive. Some of you may have had similar thoughts.

What we understand more clearly now is that its survival is not guaranteed. It is the result of people of every partisan stripe and demographic group who choose democracy, civility, and the rule of law over division, demagoguery, and the mob. It’s a choice, not a given. It’s your choice, and mine.

Life is a clarifying enterprise. The continuing debate over the direction of our country, its role in the world, and our obligations to one another commands our attention wherever we stand on the political spectrum and whatever degree you’re being awarded this week. We have disagreements about the proper path forward, some of them profound, but we share common ground in our belief in the importance of freedom, tolerance, accountability, compassion, integrity. Truth.

Education is a clarifying enterprise, too.

When I moved into Shepard Hall as a first-year student, it was the first time I had spent a night outside my home state of Kansas. My roommate, Janet Wanderman ’73 (’12 P), hailed from New York. We might as well have come from different planets. But we became friends, one piece of the process at Northwestern that challenged my assumptions and expanded my horizons. Fifty years later, I’ve reported from nearly every state, dozens of foreign countries, and six continents. I’ve covered 11 presidential campaigns and interviewed 10 presidents. After fulfilling my Northwestern science requirement with a course called The History of Science, which didn’t include doing any actual science, I sat down to ask questions of Stephen Hawking and Edward Teller.

All that wouldn’t have happened without the launchpad Northwestern turned out to be.

What I’ve learned since my own graduation day is the reality that earthquakes will reshape our landscape in ways we can’t predict, making old solutions inadequate. We have started a reckoning on race in America, not yet completed. We’ve only begun to grapple with how to respond to the warming of our planet. We’re seeing the advent of artificial intelligence that is poised to upend how things work in ways we can’t yet fathom.

I’ve also seen the breathtaking power of individuals who have purpose. Things that once seemed impossible—in medicine and music, in technology and commerce, in communications and the arts—have become routine parts of our daily lives.

Here are two apparently conflicting lessons to take to heart. One is that life is short—so accept a dare, pursue a dream, leap into a terrifying challenge, not because you’re sure you can succeed but because you aren’t at all confident that you will. The other is that life is long—so nurture friendships, give a hand to a stranger, preserve the Earth. Take a breath.

Both things can be true. Both things are.

Now it’s your turn to celebrate your graduation, to thank your parents and professors, to boldly go into a new world of possibility. Congratulations and best wishes to each of you on the remarkable journey you are about to begin.

Together, let’s send our best wishes to the Northwestern Class of 2073, not yet born, for the world they will see and the challenges they will face. Just think of the amazing letter you’ll be able to write them 50 years down the road.
