Student Research Internship Program in Pediatric Surgery

The Division of Pediatric Surgery at Lurie Children's Hospital is looking for interns for the upcoming year September 2021 - August 2022 to assist with clinical research.

We are looking for pre-health students to help support different research teams. We are looking for students who are interested in learning more about surgical health outcomes research (Weekdays M-F) or in collecting data for an Opioid study in the ED (Evening Hours and weekends).

Students must have completed at least their sophomore year. Students should exhibit strong analytical, problem-solving, and oral and written communication skills. We are looking for students who can effectively manage multiple projects and present ideas clearly and concisely. Although the program is unpaid, it offers students a chance to learn more about clinical and research activities. Interns may have the opportunity to shadow in clinic and in the operating room.

Post-Bacc and Master Students are welcomed to apply.

Responsibilities include:

• Coordinate patient recruitment
• Assist with data collection, data processing, and preparation of materials for presentations
• Maintain data collection records/data inventory
• Track and prepare study-specific information utilizing databases, spreadsheets, and other tools
• Conduct literature searches

Please provide a brief statement of interest and a resume/curriculum vitae that describes your academic coursework, research experience, volunteer and/or work experience, and your future goals to anfigueroa@luriechildrens.org. Deadline August 8, 2021

We are looking for students who are able to commit to working 10-15 hours a week during our regular work schedule (Monday-Friday 8am-6pm). Weekend positions are also available. Please confirm that this will work with your schedule and preferred volunteer dates.
