

Congratulations!

2020-2021 Leading Distributed Teams Manager Certificate Completions

Congratulations and thank you to managers across the University who dedicated their time to earning a Manager's certificate in Leading Distributed Teams. This program was designed to equip participants with skills and knowledge to lead effectively in the shift to remote/distributed work environments. The curriculum focused on virtual technology proficiency, basics of virtual meeting engagement, building team trust, and developing guiding principles to support team cohesion during distributed work.

Are you a manager? Join the [Manager's Corner MS Teams group](#) today, to discuss challenges and share resources. Upcoming topics of focus will include hybrid work environments and flexible working arrangements.
