Employers are required to maintain a summary of the benefits offered to US workers in the same occupational classification as the E-3 beneficiary. Failure to compensate E-3 employees at the same level as US employees can result in fines and backwage penalties.

ACTUAL WAGE MEMO

NU Department

Beneficiary's Title

Beneficiary's Salary and Salary Source

Please check all of the following factors considered in determining salary

- Experience
- Skills/specialized knowledge
- Licenses/certifications
- Level of responsibility/supervision
- Publications
- Other objective business-related criteria

I hereby certify that the salary listed above reflects the wage level paid to all other individuals with similar experience and qualifications working in this school/department. If there is more than one wage paid to employees, I am able to explain the reason(s) for this differential in wage rates. If required to do so, I am able to provide documentation (which must include names and payroll records of similarly employed individuals) to the DOL to verify these statements. Further, I understand that I must meet 100% of the determined wage in order for the OISS to continue the E-3 process.

BENEFITS ATTESTATION

The E-3 beneficiary will be offered the same standard benefits as U.S. workers

Certification Regarding the Release of Controlled Technology or Technical Data to Foreign Persons in the United States

NORTHWESTERN UNIVERSITY POLICY

Northwestern University is committed to freedom of access by all interested persons to the underlying data, processes, and final research results through publication and broad dissemination of those results. Consistent with this approach, Northwestern does not undertake secret or classified research whose results may not be published without prior approval by the sponsor. Additionally, unless prohibited by law, no restriction on participation in research may be based on one's country of origin or citizenship.

Some research activities are excluded from export controls because of a general exception for fundamental research provided in the National Policy on the Transfer of Scientific, Technical and Engineering Information as set forth in National Security Decision Directive 189. Fundamental research is basic and applied research in science and/or engineering where the resulting information is ordinarily published and shared broadly in the scientific community. By not accepting any restriction on publication or foreign nationals, Northwestern maintains the fundamental research exclusion.

For further information please see Northwestern University's [Export Controls & International Compliance](#) website.

DEPARTMENT AUTHORIZATIONS

I hereby certify that the technology or technical data released or otherwise provided access to the beneficiary is considered fundamental research. This fundamental research is in compliance with Northwestern University policy. A license from U.S. Department of State or U.S. Department of Commerce is NOT required to release such technology or technical data to a foreign national.

I have read and acknowledge the information provided on the second page of this form and will keep it for my records.

If there are any changes in the release of technology or technical data to the beneficiary during the term of the beneficiary's employment, I will contact the Office for Sponsored Research and the Office of the General Counsel for approval.

FURTHER INFORMATION ON DEEMED EXPORT CONTROL

U.S. Export Controls on Release of Controlled Technology or Technical Data to Foreign Persons

The Export Administration Regulations (EAR) and the International Traffic in Arms Regulations (ITAR) require authorization from the U.S. government before releasing controlled technology or technical data to foreign persons. The release of controlled technology or technical data to foreign persons, even within the United States by an employer, is a "deemed" export to the person's country(s) of nationality. U.S. entities, including universities, must seek and receive a license or exemption from the U.S. federal government before releasing controlled technology or technical data to non-U.S. persons. This includes but is not limited to nonimmigrant workers employed as H-1B, L-1, or O-1A beneficiaries.

Requirement to Certify Compliance with U.S. Export Control Regulations

The U.S. government requires each company or entity to certify that it has reviewed the EAR and ITAR and determined whether it will require a U.S. government export license to release controlled technology or technical data to the beneficiary. If an export license is required, then the company or other entity must further certify that it will not release or otherwise provide the beneficiary access to controlled technology or technical data until it has received U.S. government authorization. The petitioner must indicate whether a license is required on Page 6, Part 7 of Form I 129.

Controlled Technology and Technical Data

The export regulations (Commerce Control List (CCL) and the ITAR's U.S. Munitions list (USML) control the release of technology and technical data to foreign persons even within the United States. But most technology is not highly controlled and can be exported or released to foreign persons. Therefore, the licensing requirements affect only a small percentage of petitioners for their activities at Northwestern.

CCL: The EAR-controlled technology on the CCL generally pertains to that which is for the production, development, or use of what is basically known as "dual use" items. See the link for details: <https://www.ecfr.gov/current/title-15/subtitle-B/chapter-VII/subchapter-C/part-774>. The U.S. Department Commerce's Bureau of Industry and Security (BIS) administers the CCL. BIS is responsible for issuing licenses for the release to foreign persons of technology controlled under the EAR. Contact [Export Controls & International Compliance](#) for assistance.

USML: The ITAR-controlled technical data on the USML generally pertains to that which is directly related to defense articles. See link for details: <https://www.ecfr.gov/current/title-22/chapter-I/subchapter-M/part-121>. The U.S. Department of State's Directorate of Defense Trade Controls (DDTC) administers the USML and is responsible for issuing licenses for the release to foreign persons of technical data controlled under the ITAR. Contact [Export Controls & International Compliance](#) for assistance.
