## Confined Space Assessment Form

**Instructions:** All confined spaces must be assessed using this form. The purpose of this form is to identify the hazards and characteristics of a space to determine if it is a non-permit required space or a permit-required confined space. This assessment does not replace a Confined Space Entry Permit. This assessment must be reviewed by the entry team prior to any entry into a permit-required confined space.

Sec	Section A: General Information											
1		Name:	Type of Space:									
2	Date of Assessment Conducted by:											
3	Lo											
Sec	ection B: Confined Space Determination											
4	The space is large enough and is so configured that an employee can bodily enter and perform assigned work.											
5	The space has limited or restricted means of entry or exit.											
6	The space is not designed for continuous employee occupancy.											
7	If items 4-6 were all marked <b>Yes</b> , then the space is considered a confined space; proceed to the next section.  If you answered <b>No</b> to 4, 5, or 6, the space is not a confined space; check the box below.											
	The space does not qualify as a "confined										space":	
Sec	ction C: Atmospheric Hazards											No
8	Does the space have or have the potential to contain a hazardous atmosphere?  If Yes, check the hazard(s) below.											
9	Oxygen Deficient Oxygen Enriched (O2 below 19.5%): (O2 above 23.5%): Explosive G							sive Gas	s/Vapor:			
10	Hydro	gen Sulf	ide (H <sub>2</sub> S):	Carbon Monoxide (CO): Chlorii						ne (Cl <sub>2</sub> ):		
11	Other (specify):											
Sec	tion D: Engulf	ment Ha	azards								Yes	No
12	Does the space have the potential to engulf or suffocate the entrant?  If Yes, check the hazard(s) below.											
13	Sand:		Water:		Soil:		Gravel/ Rock:		Sewage:		Oil:	
14	Other (specify):											
Sec	Section E: Entrapment Hazards										Yes	No
15	Does the space have an internal configuration that an entrant could become trapped? If <b>Yes</b> , check the hazard(s) below.											
16	Converging Walls/ Constriction/Taper Diff Downward Sloping: to a Smaller Cross-Section: Inadequat							ult Exit/ Access:				
17	Other (specify):											

Sect	tion F: Other S	Serious	Hazards	5									Yes	No
18	Is there a potential for any other serious safety and health hazards?  If Yes, check the hazard(s) below.													
19		El	ectrical:		Moving Parts: Slips/Tri					ps/Tri <sub>l</sub>	os/Falls:			
20	Hot/	Cold Ex	tremes:		Noise/Vibration: Ch					Che	emicals:			
21	Ski	rritants:		Pressurized Steam/ Condensate: Unguarded Ma					ed Ma	chinery:				
22	Pne	Energy:		Hydraulic Energy: Stored					tored	Energy:				
23		Othe	r (specify):											
Sect	Section G: Access													
24	Fixed Ladder:	Porta Lado		Stair	rs:	Door:		Hatch:		Manhole:			Lowering Winch:	
25	Other (specify)													
Sect	tion H: Ventila	ation												
26	None:			U	nfavorable Natural					Med	hanical:			
27	Mechanical ventilation is required in th											e space:		
Sect	tion I: Rescue												Yes	No
28	Does the space have an internal configuration where non-entry rescue equipment (e.g., tripod and winch) will be <b>effective</b> in rescuing the entrant?													
29	, ,													
30	performed inside the space?  Will a standby rescue service be required outside the space if non-entry rescue equipment is ineffective in rescuing the entrant?													
Sect	Section J: Determination											Yes	No	
31	Is the snace a Permit-Required Confined Snace?													
Section K: Notes														
32														
Section L: Hazardous Energy Isolation														
Hazards indicated in sections C through F may require isolation or de-energization in accordance with
