

# Responding to Measles Symptoms

Immediate response is required when a camp participant displays measles symptoms. The disease is incredibly contagious. Prompt and proper response can make a difference in containing the spread of measles. Program staff should follow the guidance below when a camp participant displays measles symptoms, specifically when a participant has a fever and displays a rash on their face or neck.

## Measles Symptoms

Individuals with a Fever, Rash and at least one of the three symptoms below (Cough, Runny Nose, Bloodshot Eyes) should be sent home and be evaluated by a healthcare provider for measles.

## What to Do?

- 1. Mask Immediately:** The individual displaying symptoms and staff working with them should put on masks immediately.
- 2. Limit Contact:** Measles is a highly contagious illness.
- 3. Seek Care:** The individual displaying symptoms should seek care at either an urgent care center or emergency room in Evanston. **CALL AHEAD.**
- 4. Make Notification:** Program staff should notify leadership of their camp/program that an individual associated with the program is displaying symptoms.
- 5. Follow Guidance:** Guidance will be provided by the Program Director(s), the Evanston Health and Human Services Department, NM and relevant University officials.
